List of contributors *page* vii
Preface viii

1 **Special Values of the Riemann Zeta Function: Some Results and Conjectures**
A. Raghuram 1

2 **K-theoretic Background**
R. Sujatha 22

3 **Values of the Riemann Zeta Function at the Odd Positive Integers and Iwasawa Theory**
John Coates 45

4 **Explicit Reciprocity Law of Bloch–Kato and Exponential Maps**
Anupam Saikia 65

5 **The Norm Residue Theorem and the Quillen-Lichtenbaum Conjecture**
Manfred Kolster 97

6 **Regulators and Zeta-functions**
Stephen Lichtenbaum 121

7 **Soulé's Theorem**
Stephen Lichtenbaum 130

8 **Soulé's Regulator Map**
Ralph Greenberg 140

9 **On the Determinantal Approach to the Tamagawa Number Conjecture**
T. Nguyen Quang Do 154

10 Motivic Polylogarithm and Related Classes
Don Blasius 193

11 The Comparison Theorem for the Soulé–Deligne Classes
Annette Huber 210

12 Eisenstein Classes, Elliptic Soulé Elements and the ℓ -Adic Elliptic Polylogarithm
Guido Kings 239

13 Postscript
R. Sujatha 297
