

The Infinite

Third edition

A.W. Moore

Contents

<i>Preface</i>	<i>xi</i>
<i>Preface to the second edition</i>	<i>xiii</i>
<i>Preface to the third edition</i>	<i>xxi</i>
Introduction: paradoxes of the infinite	I
0.1 Paradoxes of the infinitely small	3
0.2 Paradoxes of the infinitely big	5
0.3 Paradoxes of the one and the many	9
0.4 Paradoxes of thought about the infinite	10
PART I	
The history	13
1 Early Greek thought	15
1.1 Anaximander and <i>to apeiron</i>	15
1.2 The Pythagoreans	17
1.3 The Eleatics	21
1.4 Plato	24
1.5 Early Greek mathematics	26
2 Aristotle	32
2.1 Preliminaries	32
2.2 The problem	34
2.3 The solution: the potential infinite and the actual infinite	37
2.4 Application of the solution	38
2.5 A remaining difficulty	42
3 Medieval and Renaissance thought	44
3.1 The Greek legacy: reactions and developments	44
3.2 Aquinas	47
3.3 Later developments: the mathematically infinite	48
3.4 Nicholas of Cusa. The end of the Renaissance	53

4	The calculus	56
4.1	The fundamental principles of the calculus	56
4.2	A brief history of the calculus	61
4.3	Taking stock	68
5	The rationalists and the empiricists	73
5.1	The rationalists	73
5.2	The empiricists	77
6	Kant	82
6.1	The background: an outline of Kant's philosophy	82
6.2	The metaphysically infinite and the mathematically infinite	84
6.3	The infinitude of the world. The antinomies	85
6.4	The infinitude of reason	91
7	Post-Kantian metaphysics of the infinite	95
7.1	Hegel	95
7.2	Currents of thought in post-Hegelian metaphysics of the infinite I: the 'metaphysically big'	99
7.3	Currents of thought in post-Hegelian metaphysics of the infinite II: the 'metaphysically small'	101
7.4	Currents of thought in post-Hegelian metaphysics of the infinite III: the existentialists	103
7.5	Nietzsche	106
8	The mathematics of the infinite, and the impact of Cantor	109
8.1	Bolzano	111
8.2	Turn-of-the-century work on the foundations of mathematics	112
8.3	The main elements of Cantor's theory. Its early reception	116
8.4	The theory of ordinals. The Burali-Forti paradox	121
8.5	Cantor's attitude to the paradoxes	126
8.6	Later development: axiomatization	127
9	Reactions	131
9.1	Intuitionism	131
9.2	Finitism	133
9.3	Wittgenstein	137
9.4	Recent work	141

PART II	
Infinity assessed	145
10 Transfinite mathematics	147
10.1 The iterative conception of a set. The paradox of the Set of all Sets	147
10.2 Ordinals as sets	150
10.3 Cardinals. Measuring infinite sets	151
10.4 The continuum hypothesis	154
10.5 Further thoughts on the infinite by addition and the infinite by division	155
11 The Löwenheim–Skolem theorem	159
11.1 An introduction to the Löwenheim–Skolem theorem. Reactions and counter-reactions	159
11.2 The solution to Skolem’s paradox. Scepticism and relativism	163
11.3 Scepticism and relativism rebutted	165
11.4 Meaning and understanding. The Löwenheim–Skolem theorem finally defused	167
11.5 A lingering paradox	169
12 Gödel’s theorem	172
12.1 Introduction: the Euclidean paradigm	172
12.2 A sketch of the proof of Gödel’s theorem	174
12.3 Hilbert’s programme	178
12.4 The human mind and computers	179
12.5 Self-consciousness	181
12.6 Meaning and understanding	181
13 Saying and showing	186
13.1 The saying/showing distinction in the <i>Tractatus</i>	187
13.2 The very idea of a saying/showing distinction	190
13.3 Wittgenstein’s early views on the infinite	192
13.4 The infinite and the ineffable	196
14 Infinity assessed. The history reassessed	201
14.1 The infinite and the ineffable: early Greek thought, medieval and Renaissance thought, post-Kantian thought	202
14.2 Aristotle and Kant: an unsuccessful compromise?	203
14.3 The empiricists: an uncompromising success?	204
14.4 The Wittgensteinian critique. Aristotle and Kant vindicated?	205

14.5	The impossibility of an infinite co-occurrence, and the law of the excluded middle	208
14.6	A problem for intuitionism	210
15	Human finitude	218
15.1	The nature of human finitude	218
15.2	Time	221
15.3	The infinite as an Idea of reason. The saying/showing distinction revisited	222
15.4	The poignancy of human finitude. Death	226
15.5	Being finite	230
PART III		
Infinity superseded		235
16	Infinity reassessed. The history reassessed anew	237
16.1	Spinoza versus Hegel	237
16.2	Negation	240
16.3	Transcendence	244
16.4	Spinoza versus Nietzsche	245
16.5	The infinite and the ineffable revisited	248
17	Learning how to be finite	251
17.1	The ethical significance of the Spinoza–Hegel–Nietzsche triad	251
17.2	The threat to our religion. The threat to our humanity	255
17.3	Learning how to live without the infinite	260
17.4	Reclaiming the infinite	263
Appendix		271
A.1	ZF as a formal system	271
A.2	Extensions of ZF	274
A.3	Demonstrating that the continuum hypothesis is independent of ZF	277
A.4	An argument against the continuum hypothesis	278
A.5	Further attempts to settle whether or not the continuum hypothesis is true	281
A.6	Concluding philosophical reflections	282
	<i>Glossary</i>	285
	<i>Bibliography</i>	287
	<i>Index</i>	300
