

# CONTENTS

## LECTURE I

### A GENERAL SURVEY OF THE FIELD

§ 1.	Analytic Functions of Several Complex Variables . . .	1
§ 2.	Jacobi's Theorem of Inversion and the Abelian Functions . . . . .	3
§ 3.	Periodic Functions . . . . .	4
§ 4.	The Theta Theorem . . . . .	8
§ 5.	Automorphic Functions of Several Variables . . . . .	12
§ 6.	Continuation. Hyperfuchsian and Hyperabelian Functions . . . . .	15
§ 7.	Algebraic Functions of Two Variables . . . . .	17
§ 8.	Analysis situs . . . . .	22

## LECTURE II

### SOME GENERAL THEOREMS

§ 1.	Definitions and Elementary Theorems . . . . .	23
§ 2.	Line and Surface Integrals, Residues, and their Generalizations . . . . .	25
§ 3.	The Space of Analysis, and Other Spaces . . . . .	27
§ 4.	Rational and Algebraic Functions . . . . .	32
§ 5.	Sufficient Conditions that a Function of Several Complex Variables be Analytic . . . . .	32
§ 6.	Sufficient Conditions that a Function be Rational or Algebraic . . . . .	33
§ 7.	On the Associated Radii of Convergence of a Power Series . . . . .	35
§ 8.	Hartogs's Function $R_x$ . . . . .	40
§ 9.	On the Analytic Continuation of a Logarithmic Potential . . . . .	43

§ 10.	The Representation of Certain Meromorphic Functions as Quotients.....	44
§ 11.	Integral Functions as Products of Prime Factors....	46

## LECTURE III

## SINGULAR POINTS AND ANALYTIC CONTINUATION

§ 1.	Introduction.....	50
§ 2.	Non-Essential Singularities.....	51
§ 3.	Essential Singularities.....	53
§ 4.	Removable Singularities.....	53
§ 5.	Analytic Continuation by Means of Cauchy's Integral Formula.....	55
§ 6.	Application to the Distribution of Singularities.....	59
§ 7.	Generalizations of the Theorem of § 5.....	61
§ 8.	Levi's Memoir of 1910.....	62
§ 9.	Continuation. Lacunary Spaces.....	65
§ 10.	Concerning the Boundary of the Domain of Definition of $f(x, y)$ .....	67
§ 11.	A Theorem Relating to Characteristic Surfaces.....	68

## LECTURE IV

## IMPLICIT FUNCTIONS

§ 1.	Weierstrass's Theorem of Factorization.....	71
§ 2.	A Tentative Generalization of the Theorem of Factorization.....	74
§ 3.	Algebroid Configurations.....	75
§ 4.	Continuation. The Branch Points of the Discriminant.....	78
§ 5.	Single-Valued Functions on an Algebroid Configuration.....	80
§ 6.	Solution of a System of Analytic Equations. Weierstrass's Theorem.....	82
§ 7.	Continuation. A General Theorem.....	83
§ 8.	The Inverse of an Analytic Transformation.....	87

## LECTURE V

## THE PRIME FUNCTION ON AN ALGEBRAIC CONFIGURATION

§ 1.	The Algebraic Functions of Deficiency 1 and the Doubly Periodic Functions. Generalizations. . . .	89
§ 2.	The Prime Function Defined as a Limit. . . . .	92
§ 3.	The Existence Theorems. . . . .	94
§ 4.	Dependence on the Parameter. . . . .	97
§ 5.	The Functions in the Automorphic Fundamental Domain. . . . .	98
§ 6.	An Auxiliary Function. . . . .	102
§ 7.	The Prime Function $\Omega(t, \tau)$ . . . . .	105
§ 8.	The Determination of $\Omega(t, \tau)$ by Functional Equations. . . . .	106
§ 9.	The Abelian Integrals in Terms of the Prime Function	108
§ 10.	The Integral of the Second Kind on $F$ . . . . .	111
§ 11.	The Integrands of the Integrals of the First Kind. . .	113
§ 12.	The Algebraic Functions. . . . .	115
§ 13.	Parametric Representation of a Homogeneous Algebraic Configuration. . . . .	116
§ 14.	Linear Differential Equations on an Algebraic Configuration, and the Factor $\varphi'(t)$ . . . . .	118
