

# SOCIAL NETWORK ANALYSIS

Third Edition

David Knoke  
*University of Minnesota*

Song Yang  
*University of Arkansas*

Los Angeles | London | New Delhi  
Singapore | Washington DC | Melbourne

# CONTENTS

<b>Series Editor's Introduction</b>	<b>ix</b>
<b>About the Authors</b>	<b>xi</b>
<b>Acknowledgments</b>	<b>xiii</b>
<b>Chapter 1. Introduction to Social Network Analysis</b>	<b>1</b>
<b>Chapter 2. Network Fundamentals</b>	<b>7</b>
2.1. Underlying Assumptions	7
2.2. Entities and Relations	10
2.3. Networks	12
2.4. Research Design Elements	14
<b>Chapter 3. Data Collection</b>	<b>21</b>
3.1. Boundary Specification	21
3.2. Data Collection Procedures	27
3.3. Cognitive Social Structure	39
3.4. Missing Data	42
3.5. Measurement Error	46
3.6. Collecting Network Data	49
<b>Chapter 4. Basic Methods for Analyzing Networks</b>	<b>55</b>
4.1. Network Representation: Graphs and Matrices	55
4.2. Nodes: Centrality, Power, Prestige	62
4.3. Dyads: Walk, Path, Distance, Reachability	69
4.4. Subgroups: Transitivity and Cliques	72
4.5. Whole Networks: Size, Density, Centralization	76
4.6. Structural, Regular, and Automorphic Equivalence	81
<b>Chapter 5. Advanced Methods for Analyzing Networks</b>	<b>91</b>
5.1. Ego-Nets	91
5.2. Visualizations: Clustering, MDS, Blockmodels	97
5.3. Two-Mode and 3-Mode Networks	105
5.4. Community Detection	117
5.5. Exponential Random Graph Models (ERGMs)	120
5.6. Future Directions in Network Analysis	126

<b>Appendix: Social Network Analysis Software Packages</b>	<b>129</b>
