

Exploratory Factor Analysis

W. Holmes Finch
Ball State University

Los Angeles | London | New Delhi
Singapore | Washington DC | Melbourne

CONTENTS

Series Editor's Introduction	ix
About the Author	xi
Acknowledgments	xiii
Chapter 1: Introduction to Factor Analysis	1
Latent and Observed Variables	1
The Importance of Theory in Doing Factor Analysis	3
Comparison of Exploratory and Confirmatory	
Factor Analysis	5
EFA and Other Multivariate Data Reduction Techniques	7
A Brief Word About Software	10
Outline of the Book	10
Chapter 2: Mathematical Underpinnings of	
Factor Analysis	13
Correlation and Covariance Matrices	13
The Common Factor Model	15
Correspondence Between the Factor Model	
and the Covariance Matrix	18
Eigenvalues	19
Error Variance and Communalities	21
Summary	22
Chapter 3: Methods of Factor Extraction in Exploratory	
Factor Analysis	23
Eigenvalues, Factor Loadings, and the Observed Correlation	
Matrix	25
Maximum Likelihood	28
Principal Axis Factoring	29
Principal Components Analysis	30
Principal Components Versus Factor Analysis	31
Other Factor Extraction Methods	32
Example	33
Summary	37
Chapter 4: Methods of Factor Rotation	39
Simple Structure	39
Orthogonal Versus Oblique Rotation Methods	40

Common Orthogonal Rotations	42
Varimax Rotation	42
Quartimax Rotation	46
Equamax Rotation	47
Common Oblique Rotations	48
Promax Rotation	48
Oblimin	53
Geomin Rotation	55
Target Factor Rotation	57
Bifactor Rotation	60
Example	64
Deciding Which Rotation to Use	67
Summary	68
Appendix	70
Chapter 5: Methods for Determining the Number of Factors to Retain in Exploratory Factor Analysis	
Retain in Exploratory Factor Analysis	71
Scree Plot and Eigenvalue Greater Than 1 Rule	71
Objective Methods Based on the Scree Plot	75
Eigenvalues and the Proportion of Variance Explained	77
Residual Correlation Matrix	79
Chi-Square Goodness of Fit Test for Maximum Likelihood	80
Parallel Analysis	82
Minimum Average Partial	84
Very Simple Structure	85
Example	87
Summary	90
Chapter 6: Final Issues in Factor Analysis	93
Proper Reporting Practices for Factor Analysis	94
Factor Scores	96
Power Analysis and A Priori Sample Size Determination	101
Dealing With Missing Data	103
Exploratory Structural Equation Modeling	106
Multilevel EFA	107
Summary	109
References	111
Index	119
