

SMALL SAMPLE SIZE SOLUTIONS

A Guide for Applied Researchers
and Practitioners

*Edited by Rens van de Schoot and
Milica Miočević*

CONTENTS

<i>Introduction</i>	<i>viii</i>
Rens van de Schoot and Milica Miočević	
<i>List of symbols</i>	<i>xi</i>

PART I

Bayesian solutions	1
1 Introduction to Bayesian statistics	3
<i>Milica Miočević, Roy Levy, and Rens van de Schoot</i>	
2 The role of exchangeability in sequential updating of findings from small studies and the challenges of identifying exchangeable data sets	13
<i>Milica Miočević, Roy Levy, and Andrea Savord</i>	
3 A tutorial on using the WAMBS checklist to avoid the misuse of Bayesian statistics	30
<i>Rens van de Schoot, Duco Veen, Laurent Smeets, Sonja D. Winter, and Sarah Depaoli</i>	
4 The importance of collaboration in Bayesian analyses with small samples	50
<i>Duco Veen and Marthe Egberts</i>	

5	A tutorial on Bayesian penalized regression with shrinkage priors for small sample sizes <i>Sara van Erp</i>	71
PART II		
n = 1		85
6	One by one: the design and analysis of replicated randomized single-case experiments <i>Patrick Onghena</i>	87
7	Single-case experimental designs in clinical intervention research <i>Marija Maric and Vera van der Werff</i>	102
8	How to improve the estimation of a specific examinee's ($n = 1$) math ability when test data are limited <i>Kimberley Lek and Ingrid Arts</i>	112
9	Combining evidence over multiple individual analyses <i>Fayette Klaassen</i>	126
10	Going multivariate in clinical trial studies: a Bayesian framework for multiple binary outcomes <i>Xynthia Kavelaars</i>	139
PART III		
Complex hypotheses and models		155
11	An introduction to restriktor: evaluating informative hypotheses for linear models <i>Leonard Vanbrabant and Yves Rosseel</i>	157
12	Testing replication with small samples: applications to ANOVA <i>Mariëlle Zondervan-Zwijnenburg and Dominique Rijshouwer</i>	173
13	Small sample meta-analyses: exploring heterogeneity using MetaForest <i>Caspar J. van Lissa</i>	186

14	Item parcels as indicators: why, when, and how to use them in small sample research	203
	<i>Charlie Rioux, Zachary L. Stickle, Omolola A. Odejimi, and Todd D. Little</i>	
15	Small samples in multilevel modeling	215
	<i>Joop Hox and Daniel McNeish</i>	
16	Small sample solutions for structural equation modeling	226
	<i>Yves Rosseel</i>	
17	SEM with small samples: two-step modeling and factor score regression versus Bayesian estimation with informative priors	239
	<i>Sanne C. Smid and Yves Rosseel</i>	
18	Important yet unheeded: some small sample issues that are often overlooked	255
	<i>Joop Hox</i>	
	<i>Index</i>	266
