

# Applied Oral Physiology

The Integration of Sciences in Clinical Dentistry

**Robin Wilding, BDS, Dip Pros, M Dent, PhD, MSc**  
Emeritus Professor  
Department of Oral Biology  
University of the Western Cape  
Cape Town, South Africa

166 illustrations

# Contents

Preface .....	xii
Acknowledgments .....	xiii
About the Author .....	xiv
<b>1. The Origins of Teeth.....</b>	<b>1</b>
1.1 Evolution .....	1
1.2 The Teeth as Tools.....	1
1.2.1 Tooth Strength.....	1
1.2.2 Tooth Design.....	1
1.2.3 Tooth Wear in Man.....	2
<b>2. Dental Hard Tissues .....</b>	<b>4</b>
2.1 Enamel: Clinical Aspects.....	4
2.1.1 Enamel Minerals .....	4
2.1.2 Enamel: Non-Minerals.....	4
2.1.3 Enamel Etching .....	4
2.1.4 Early Enamel Caries .....	5
2.1.5 Arrested Enamel Caries.....	5
2.2 Pulp-Dentin: Clinical Aspects .....	7
2.2.1 Physical Properties.....	7
2.2.2 Tubules.....	7
2.2.3 Permeability.....	9
2.2.4 Response to Irritation.....	9
2.2.5 Secondary Dentin.....	9
2.2.6 Dental Pulp Hyperemia.....	9
2.2.7 The Pulp Chamber and Root Canal.....	10
<b>2.3 Response of the Pulp-Dentin to Caries... 11</b>	
2.3.1 Bacterial Penetration .....	11
2.3.2 Secondary Caries.....	12
2.3.3 Conservative Management of Deep Caries....	12
2.3.4 Arrested Caries in Dentin .....	12
2.3.5 Regeneration after Pulpal Exposure .....	13
2.3.6 The Origin of Replacement Odontoblasts .....	13
<b>3. Oral Mucosa and Periodontium.....</b>	<b>15</b>
3.1 Structure of Oral Mucosa.....	15
3.1.1 Oral Epithelium .....	15
3.1.2 Lamina Propria .....	16
3.2 Function of Oral Mucosa .....	16
3.2.1 Rates of Turnover of Oral Mucosa.....	17
3.3 Regional Variation of Oral Mucosa .....	17
3.3.1 Masticatory Mucosa .....	17
3.3.2 Lining Mucosa .....	19
3.3.3 Gustatory Mucosa.....	19
3.4 Alveolar Bone .....	19
3.5 The Periodontal Ligament.....	20
3.5.1 Periodontal Ligament Fibers .....	20
3.5.2 Response of the Periodontal Ligament to Loading.....	21
3.5.3 Cells of the Periodontal Ligament.....	21
3.5.4 Vascular Supply of the Periodontal Ligament .....	22
3.5.5 Functions of the Periodontal Ligament .....	22
<b>3.6 Cementum .....</b>	<b>22</b>
3.6.1 Functions of Cementum .....	22
3.6.2 Origins of Cementum.....	23
3.6.3 Changes in Cementum with Aging.....	24
3.6.4 Cementum Formation in Healing.....	24
<b>3.7 Junctional Epithelium .....</b>	<b>24</b>
3.7.1 Loss of Epithelial Attachment .....	25
3.7.2 Influence of Female Hormones .....	26

<b>4.</b>	<b>The Ecology of the Oral Cavity</b> .....	28		
<b>4.1</b>	<b>Introduction</b> .....	28	<b>4.4</b>	<b>Oral Ecology and Dental Caries</b> .....
<b>4.2</b>	<b>The Oral Environment</b> .....	29	4.4.1	Diet and Control of Dental Caries.....
4.2.1	Salivary Pellicle .....	30	4.4.2	Risk Factors in Predicting Dental Caries .....
4.2.2	How Saliva Defines the Oral Environment .....	30	4.4.3	Dental Caries, Infection, or Dietary Disorder?.....
4.2.3	Rate of Flow of Saliva .....	33	<b>4.5</b>	<b>Nutrition and Oral Ecology</b> .....
4.2.4	Gingival Crevicular Fluid.....	33	4.5.1	Oral Manifestation of Malnutrition .....
<b>4.3</b>	<b>The Biofilms of the Oral Environment</b> ....	34	4.5.2	Trace Elements, Minerals, and Vitamins .....
4.3.1	Biofilms .....	34	<b>4.6</b>	<b>The Influence of Fluorides on the Oral Ecosystem</b> .....
4.3.2	Calculus .....	35	4.6.1	Distribution of Fluoride in Teeth .....
4.3.3	Growth of a Biofilm .....	35	4.6.2	Fluoride Protection of Enamel.....
4.3.4	Dental Plaque.....	35	4.6.3	Administration of Fluoride.....
4.3.5	Variations in Plaque .....	36	<b>4.7</b>	<b>Mucosal Immunity and Oral Ecology</b> .....
4.3.6	From Symbiont to Pathobiont.....	37	4.7.1	General Barriers to Infection .....
4.3.7	Cross-Infection Control .....	38	4.7.2	Mucosal Immunity .....
4.3.8	Single Organism or Consortium .....	38	4.7.3	Antigen Tolerance .....
4.3.9	Dental Caries .....	38	4.7.4	A Caries Vaccine.....
4.3.10	Periodontal Disease .....	38		
<b>5.</b>	<b>Cell Differentiation in Embryology and Repair</b> .....	48		
<b>5.1</b>	<b>Cell Interactions in Differentiation</b> .....	48	<b>5.3</b>	<b>Cell Interactions in Repair and Regeneration</b> .....
5.1.1	Cell Differentiation .....	48	5.3.1	Wound Healing .....
5.1.2	Cell Differentiation during Embryology .....	48	5.3.2	Healing of a Tooth Socket .....
5.1.3	Cell and Matrix Interactions in Tooth Development .....	49	5.3.3	Healing of a Pulp Exposure.....
<b>5.2</b>	<b>Tooth Morphogenesis</b> .....	49	5.3.4	Cytokines and Extracellular Matrix in Healing
5.2.1	Generic Tooth Forms .....	49	5.3.5	Comparison between Repair and Embryology
5.2.2	Cusp Morphology .....	51	5.3.6	Nutrition, Embryology, and Healing .....
<b>6.</b>	<b>The Extracellular Matrix</b> .....	57		
<b>6.1</b>	<b>Glycosaminoglycans</b> .....	57	6.2.4	Metalloproteins.....
6.1.1	Types of Glycosaminoglycans .....	57	6.2.5	Periostin .....
6.1.2	Properties of Glycosaminoglycans .....	57	<b>6.3</b>	<b>Fibrous Matrix Proteins</b> .....
<b>6.2</b>	<b>Glycoproteins</b> .....	58	6.3.1	Collagen.....
6.2.1	Bone Glycoproteins.....	58	6.3.2	Elastin.....
6.2.2	Fibronectin .....	58	6.3.3	Keratin .....
6.2.3	Laminin .....	58	<b>6.4</b>	<b>Matricellular Proteins</b> .....
<b>7.</b>	<b>The Physiology of Bone</b> .....	62		
<b>7.1</b>	<b>The Mineralization Process</b> .....	62	7.1.2	Solubility of Apatites .....
7.1.1	Composition of Biological Apatites .....	62	7.1.3	Production of Apatite Crystals.....

<b>7.2</b>	<b>Mechanisms of Mineralization</b> .....	63	<b>7.5</b>	<b>General Features of Growth</b> .....	69
7.2.1	Control of Mineralization by Organic Components .....	63	7.5.1	Phases of Growth .....	69
7.2.2	Control of Mineralization by Cells .....	64	7.5.2	Measuring Growth .....	70
<b>7.3</b>	<b>Methods of Bone Formation</b> .....	64	7.5.3	Soft Tissue (Functional) Matrices .....	70
7.3.1	Origins of Bone .....	64	<b>7.6</b>	<b>Growth of the Skull and Jaws</b> .....	70
7.3.2	Structure of Cartilage .....	64	7.6.1	Growth of the Cranium and Face .....	70
7.3.3	Cartilage as a Skeletal Material .....	64	7.6.2	Growth of the Mandible .....	71
7.3.4	Intramembranous Bone Formation .....	65	<b>7.7</b>	<b>Bone Remodeling</b> .....	72
7.3.5	Growth of Intramembranous Bone .....	66	7.7.1	Mechanical Loads and Bone Remodeling .....	72
7.3.6	Endochondral Bone Formation .....	66	7.7.2	Cellular Process of Bone Remodeling .....	72
7.3.7	Summary of Differences between Cartilage and Bone .....	68	7.7.3	Transformation of Stress to Bone Cells .....	73
<b>7.4</b>	<b>Development of the Skull and Jaws</b> .....	68	7.7.4	Tooth Repositioning .....	73
7.4.1	Development of the Mandible .....	68	7.7.5	Remodeling of the Tooth Socket .....	74
7.4.2	Development of the Temporomandibular Joint .....	68	7.7.6	Tooth Displacement and Cell Rests of Malassez .....	74
7.4.3	Synchondrosis of the Cranial Base .....	68	7.7.7	Response of Alveolar Bone to Dentures .....	75
			7.7.8	Response of Bone to Implants .....	75
			7.7.9	Systemic Factors and Bone Turnover .....	76
<b>8.</b>	<b>Eruption, Occlusion, and Wear</b> .....	78			
<b>8.1</b>	<b>Eruption</b> .....	78	8.2.5	Summary .....	85
8.1.1	Phases of Eruption .....	78	8.2.6	Purpose of Cusps .....	85
8.1.2	Formation of the Epithelial Attachment .....	78	8.2.7	Arch and Tooth Relationships .....	85
8.1.3	Eruptive Mechanisms .....	79	8.2.8	Curves of Occlusion .....	86
8.1.4	Tooth Position after Eruption .....	80	8.2.9	Tooth Contacts during Function .....	86
8.1.5	Incomplete Eruption .....	80	8.2.10	Anterior Tooth Contact .....	87
8.1.6	Deciduous Dentition .....	80	8.2.11	Summary of Arch and Tooth Relationships ...	88
8.1.7	Differences between Deciduous and Permanent Teeth .....	80	8.2.12	Class II Arch and Tooth Relationships .....	89
8.1.8	Mixed Dentition .....	81	8.2.13	Occlusion and Wear .....	89
<b>8.2</b>	<b>Occlusion</b> .....	82	<b>8.3</b>	<b>Tooth Wear</b> .....	90
8.2.1	Stability of the Dentition .....	82	8.3.1	Types of Tooth Wear .....	90
8.2.2	Arch Stability .....	82	8.3.2	Consequences of Tooth Wear .....	90
8.2.3	Tooth Stability .....	83	8.3.3	Other Compensatory Mechanisms for Continued Eruption .....	90
8.2.4	The Distribution of Bite Forces on Teeth .....	84			
<b>9.</b>	<b>The Temporomandibular Joint</b> .....	92			
<b>9.1</b>	<b>The Mechanics of the Temporomandibular Joint</b> .....	92	<b>9.2</b>	<b>The Structure of the Temporomandibular Joint</b> .....	94
9.1.1	A Load-Bearing Joint .....	92	<b>9.3</b>	<b>Movement at the Temporomandibular Joint</b> .....	95
9.1.2	Variable Forces at the Teeth .....	93	9.3.1	Constraints of Jaw Movements .....	95
9.1.3	Joint Stability .....	93	9.3.2	Disk Displacement .....	96
9.1.4	Joint Instability and Muscle Fatigue .....	94	9.3.3	Condyle Position .....	96

<b>9.4</b>	<b>Temporomandibular Dysfunction</b> . . . . .	97	9.4.5	Axis II—Psychosocial Factors (Symptoms) . . . .	98
9.4.1	Diagnosis . . . . .	97	9.4.6	Evidence-Based Etiology . . . . .	98
9.4.2	General Description of Temporomandibular Dysfunction . . . . .	97	9.4.7	Diagnostic Tests . . . . .	98
9.4.3	Research Diagnostic Criteria . . . . .	97	9.4.8	Illness Behavior . . . . .	99
9.4.4	Axis I—Physical Factors (Signs) . . . . .	98	9.4.9	Management of Temporomandibular Dysfunction . . . . .	99
<b>10.</b>	<b>Oral Sensations and Functions</b> . . . . .	100			
<b>10.1</b>	<b>The Nature of Pain</b> . . . . .	100	10.5.3	Chronic Pain Management . . . . .	110
10.1.1	Injury without Pain . . . . .	100	10.5.4	Pain Control Mechanisms . . . . .	110
10.1.2	Pain without Injury . . . . .	101	<b>10.6</b>	<b>Taste</b> . . . . .	111
10.1.3	Chronic Pain . . . . .	101	10.6.1	General Features of Taste . . . . .	111
10.1.4	Measuring Pain . . . . .	101	10.6.2	Modalities and Distribution . . . . .	111
<b>10.2</b>	<b>Psychological Factors and Pain</b> . . . . .	101	10.6.3	Taste Buds . . . . .	111
10.2.1	Culture . . . . .	101	<b>10.7</b>	<b>Oral Proprioception</b> . . . . .	112
10.2.2	Past Experience . . . . .	101	10.7.1	Skin and Mucosa . . . . .	112
10.2.3	The Meaning of Pain . . . . .	102	10.7.2	Periodontal Receptors . . . . .	112
10.2.4	Control over Pain . . . . .	102	10.7.3	Altered Feedback . . . . .	112
10.2.5	Suggestion and Placebo . . . . .	102	10.7.4	Temporomandibular Joint Receptors . . . . .	113
10.2.6	Hypnosis . . . . .	102	<b>10.8</b>	<b>Oral Reflexes</b> . . . . .	113
