Preface					xiv
Contributors					xv
1 History and Introduction to Vertebral Augmentation					1
<i>M.R. Chambers</i>					
1.1 Introduction	1	1.5 Risks and Complications			7
1.2 Mechanisms of Pain Relief	1	1.6 Clinical Applications and Evidence			7
1.3 Procedures	2	1.6.1 Osteoporosis			7
1.3.1 Vertebroplasty	2	1.6.2 Trauma			9
1.3.2 Kyphoplasty	2	1.6.3 Bone Disease, Cancer, Metastases, and Multiple Myeloma			10
1.3.3 Radiofrequency Kyphoplasty	2	1.6.4 Langerhans Cell Vertebral Histiocytosis			11
1.3.4 Percutaneous Radiofrequency Ablation	2	1.6.5 Osteogenesis Imperfecta			11
1.3.5 Vertebral Augmentation with Implants	3	1.7 Conclusion			11
1.4 Indications and Contraindications	4				
2 Vertebral Compression Fractures					15
<i>Amanda Schnell, Sarah Morgan, James Mooney, D. Mitchell Self, John W. Amburgy, and M.R. Chambers</i>					
2.1 Introduction	15	2.5.2 Pathologic Vertebral Fractures due to Neoplasia			26
2.2 Presentation and Diagnosis	15	2.5.3 Traumatic Vertebral Fractures			26
2.3 Epidemiology	15	2.6 Public Health and Economic Impact			27
2.3.1 Osteoporosis	15	2.6.1 Osteoporosis			27
2.3.2 Cancer	18	2.6.2 Cancer			27
2.3.3 Trauma	19	2.6.3 Trauma			27
2.4 Vertebral Fracture Classification Systems	20	2.6.4 Cost-Effectiveness			28
2.5 Treatment	25	2.7 Conclusion			29
2.5.1 Osteoporotic Vertebral Compression Fractures	25				
3 Preprocedure Assessment Prior to Vertebral Augmentation					32
<i>Scott Kreiner and Grace Maloney</i>					
3.1 Introduction	32	3.4 General Indications, Contraindications, and Procedure Complications			33
3.2 Anatomy, Radiologic Imaging, Identification, and Interpretation of Vertebral Compression Fractures	32	3.5 Equipment and Room Setup			34
3.3 Preprocedure Assessment	32	3.6 Procedure			35
		3.7 Postprocedure Management			36
4 Physical Examination Findings in Patients with Vertebral Compression Fractures					37
<i>Scott Kreiner</i>					
4.1 Introduction	37	4.2 Presentation of Vertebral Compression Fractures			37

4.3	Risk Factors	38	4.5	Observational Findings Suggesting Compression Fracture	39
4.4	Red Flags	38			
5	Medical Pain Management in Patients with Vertebral Compression Fractures	41			
	<i>Young Hoon Kim and Yong-Chul Kim</i>				
5.1	Introduction	41	5.6	Calcitonin	43
5.2	Nonsteroidal Anti-Inflammatory Drugs	41	5.7	Transdermal Lidocaine	43
5.3	Acetaminophen	42	5.8	Bisphosphonate	43
5.4	Opioid Analgesics	43	5.9	Anticonvulsants	43
5.5	Muscle Relaxants	43	5.10	Conclusion	44
6	Approaches to the Vertebral Body	46			
	<i>D. Mitchell Self, James Mooney, John W. Amburgy, and M.R. Chambers</i>				
6.1	Introduction	46	6.6.2	Transpedicular Approach	50
6.2	Indications	46	6.6.3	Extrapedicular and Parapedicular Approaches	51
6.3	Anatomy	46	6.6.4	Extrapedicular Modified Inferior End Plate Access	52
6.3.1	Planning the Trajectory	47	6.6.5	Parapedicular Approach	52
6.4	Bilateral versus Unilateral Approach	48	6.6.6	Parapedicular Approach to the Vertebral Body	53
6.5	Imaging and Equipment	49	6.6.7	Approaches to the Cervical Spine	55
6.6	Procedure	49	6.7	Vertebral Body Biopsy	56
6.6.1	Potential Risks and Management of Complications	50	6.8	Conclusion	56
7	Properties of Bone Cements and Vertebral Fill Materials: Implications for Clinical Use in Image-Guided Therapy and Vertebral Augmentation	58			
	<i>David Nussbaum, Adam Thakore, and Kieran Murphy</i>				
7.1	Introduction	58	7.4	Mixing Method	62
7.2	Bone Cement Types	58	7.5	Antibiotics	62
7.2.1	Polymer Chemistry	59	7.6	Pain Relief	63
7.2.2	PMMA-Based Bone Cements	60	7.7	Bone Adherence	63
7.3	Cement Properties	60	7.8	Bone Formation and Other New Developments	63
7.3.1	Liquid-to-Powder Ratio	60	7.9	The Future	64
7.3.2	Initiator-to-Activator Ratio	61	7.10	Conclusion	64
7.3.3	Radiopacifiers	62	7.11	Pearls	64
7.3.4	Polymethyl Methacrylate Bead Size	62			
8	Vertebroplasty	66			
	<i>Nicole S. Carter, Hong Kuan Kok, Julian Maingard, Hamed Asadi, Lee-Anne Slater, Thabele Leslie-Mazwi, Joshua A. Hirsch, and Ronil V. Chandra</i>				
8.1	Introduction	66	8.3.3	Positioning	67
8.2	Anatomic Features	66	8.3.4	Antibiotic Prophylaxis and Skin Preparation	67
8.3	The Procedure	67	8.3.5	Needle Placement	68
8.3.1	Procedure Materials	67	8.3.6	Image Guidance	68
8.3.2	Sedation and Anesthetic Preparation	67	8.3.7	Needle Insertion	68

8.3.8	Fill Materials	69	8.5.1	Initial Postprocedure Care	71
8.3.9	Cement Injection	70	8.5.2	Discharge and Follow-Up	71
8.3.10	Volume of Cement Injected	70	8.6	Conclusion	71
8.4	Considerations in Cervical Vertebroplasty	71	8.7	Key Points	72
8.5	Postprocedure Care	71			
9	Sacroplasty: Management of Sacral Insufficiency Fractures	73			
	<i>Kieran Murphy</i>				
9.1	Introduction	73	9.6.1	Conservative Treatment	75
9.2	Fractures of the Sacrum: Anatomy	73	9.6.2	Osseous Augmentation	76
9.3	Sacral Insufficiency Fractures: Causes and Natural History	74	9.7	Techniques	76
9.4	History and Examination	74	9.7.1	Short-Axis Technique	77
9.5	Imaging	74	9.7.2	Long-Axis Technique	78
9.6	Treatment	75	9.7.3	Lateral Approach Technique	78
			9.8	Outcomes	79
10	Cervical and Posterior Arch Augmentation	82			
	<i>Luigi Manfre, Nicole S. Carter, Joshua A. Hirsch, and Ronil V. Chandra</i>				
10.1	Cervical Augmentation	82	10.1.7	Conclusion	84
10.1.1	Introduction	82	10.2	Posterior Arch Augmentation	85
10.1.2	Historical Perspective	82	10.2.1	Introduction	85
10.1.3	Image Guidance	82	10.2.2	Pediculoplasty	85
10.1.4	Procedural Approaches	83	10.2.3	Laminoplasty and Spinoplasty	85
10.1.5	Prevention of Infection	84	10.2.4	Key Points	86
10.1.6	Complications	84			
11	Balloon Kyphoplasty	88			
	<i>James Mooney, John W. Amburgy, D. Mitchell Self, Leah J. Schoel, and M.R. Chambers</i>				
11.1	Introduction	88	11.5.1	Bilateral versus Unilateral Approach	93
11.2	Materials	88	11.6	Risks and Benefits	94
11.2.1	Bone Access Tools	89	11.7	Importance of Sagittal Balance Restoration and Kyphosis Correction	94
11.2.2	Balloons Tamps and Inflation Devices	89	11.8	Adjacent Fractures	95
11.2.3	Bone Cement	89	11.9	Postoperative Care	96
11.3	Diagnosis and Preoperative Preparation	89	11.10	Conclusion	96
11.4	Indications and Contraindications	90			
11.5	Procedure	90			
12	Vertebral Augmentation with Implants	99			
	<i>Dimitrios K. Filippiadis, Stefano Marcia, and Alexios Kelekis</i>				
12.1	Introduction	99	12.5	Advantages and Disadvantages of Vertebral Implants	102
12.2	The Implants	99	12.6	Postprocedure Care	102
12.3	The Procedures	101			
12.4	Bilateral versus Unilateral Approach	102			

13	Radiation Exposure and Protection: A Conversation Beyond the Inverse Square Law, Thermoluminescent Dosimeters, and Lead Aprons.....	104		
	<i>Kieran Murphy, Susannah Ryan, Marie-Constance Lacasse, Adam Thakore, and Danyal Khan</i>			
13.1	Introduction	104	13.3	Radiation Dose to the Operator and Patient During Vertebroplasty/Kyphoplasty
13.2	Gene Mutation and Radiation Effects on DNA Leading to the Development of Cancer	104		105
14	Appropriateness Criteria for Vertebral Augmentation	107		
	<i>Alexios Kelekis and Dimitrios K. Filippiadis</i>			
14.1	Introduction	107	14.3	Appropriateness Criteria
14.2	Indications, Guidelines, and Recommendations	107		109
15	Literature Analysis of Vertebral Augmentation	113		
	<i>Nicole S. Carter, Hong Kuan Kok, Julian Maingard, Hamed Asadi, Lee-Anne Slater, Thabele Leslie-Mazwi, Joshua A. Hirsch, and Ronil V. Chandra</i>			
15.1	Introduction	113	15.4	Evidence for Safety
15.2	Early Data	113	15.4.1	Overall Complications
15.3	Evidence for Efficacy	113	15.4.2	Cement Leakage.....
15.3.1	Vertebroplasty	113	15.4.3	Subsequent Fractures.....
15.3.2	Kyphoplasty	116	15.5	Mortality Benefit.....
15.3.3	Vertebroplasty Compared with Kyphoplasty	117	15.6	Conclusion.....
15.3.4	The Kiva System.....	117	15.7	Key Points
				119
16	Cost-Effectiveness of Vertebral Augmentation	122		
	<i>Andrew Brook, Gregory Parnes, David Kramer, Steven M. Henick, Allan L. Brook, and Derrick D. Wagoner</i>			
16.1	Introduction	122	16.2	Cost-Effectiveness.....
				123
17	Additional and Adjacent Level Fractures after Vertebral Augmentation	126		
	<i>Scott Kreiner</i>			
17.1	Introduction	126	17.3	Possible Influences of Vertebral Augmentation Technique
17.2	Risk Factors for Additional or Adjacent-Level Fractures	126		126
18	Predisposing Factors to Vertebral Fractures	130		
	<i>Olivier Clerk-Lamallice</i>			
18.1	Introduction	130	18.2.2	Pathologic Fractures
18.2	Current Information Based on Recent Literature and State-of-the-Art Practice	130	18.2.3	Fractures Secondary to Infection.....
18.2.1	Osteoporosis.....	130	18.2.4	Traumatic Fractures
			18.3	Key Points
				134

19	Bracing for Spinal Fractures	135		
	<i>Aaron L. Cross and Andrew L. Sherman</i>			
19.1	Introduction	135	19.3.2	Types of Thoracolumbar Braces 136
19.2	Cervical Fracture Bracing	135	19.3.3	Concepts on the Use of the TLSO Braces 137
19.3	Lumbar and Thoracic Compression Fracture Bracing	136	19.3.4	Bracing for Traumatic Burst Fractures of the Lumbar and Thoracic Spine 139
19.3.1	Introduction	136	19.4	Osteoporotic Lumbar and Thoracic Fractures
				139
20	Amount of Cement or Vertebral Fill Material for Optimal Treatment and Pain Relief	141		
	<i>Kieran Murphy and Susannah Ryan</i>			
20.1	Introduction	141	20.3	Treatment of Degenerative End Plate Changes with Osseous Augmentation 144
20.2	What are the Mechanisms of Pain Relief in Vertebral Augmentation?	141	20.4	Conclusion
20.2.1	Mechanical Stability	141	20.5	Pearls
20.2.2	Denervation of the Vertebra and the Role of C Fibers and the Basivertebral Nerve	143		
21	Clinical Presentation and the Response to Vertebral Augmentation	147		
	<i>Alexios Kelekis and Dimitrios K. Filippidis</i>			
21.1	Clinical Presentation	147	21.2	Response to Vertebral Augmentation
				148
22	Effect of Vertebral Augmentation on Morbidity and Mortality	151		
	<i>Jae Hun Kim and Yong-Chul Kim</i>			
22.1	Introduction	151	22.3	Outcome of Patients with Vertebral Fractures Not Treated with Vertebral Augmentation
22.2	Nonsurgical Management vs. Vertebral Augmentation	151		
				152
23	Number of Levels Appropriately Treated with Vertebral Augmentation	156		
	<i>Pyung-Bok Lee and Yong-Chul Kim</i>			
23.1	Introduction	156	23.5	Diagnosis of Painful Vertebral Compression Fractures
23.2	Neoplastic Vertebral Fractures	156	23.6	Safety of Treating Multiple Vertebral Compression Fractures
23.3	Risk Factors for Vertebral Compression Fractures	156	23.7	Conclusion
23.4	Number of Levels to Treat with Vertebral Augmentation	156		
				160
24	Pain after Vertebral Augmentation	162		
	<i>Scott Kreiner</i>			
24.1	Introduction	162	24.4	Facet-Mediated Pain
24.2	Complications from Procedure	162	24.5	Sagittal Imbalance
24.3	Recurrent Fracture	164		
				166

25	Postural Fatigue Syndrome	168		
	<i>Olivier Clerk-Lamallice</i>			
25.1	Introduction	168	25.4	Treatment
25.2	Clinical Presentation	168	25.5	Key Points
25.3	Pathophysiology	168		
26	Physical Therapy after Vertebral Augmentation	170		
	<i>Murray Echt, Andrew I. Gitkind, and Allan L. Brook</i>			
26.1	Introduction	170	26.4	Rehabilitation as Part of Postinterventional Care
26.2	Rehabilitation as Part of Routine Anti-Osteoporosis Care	170	26.5	Conclusion
26.3	Rehabilitation after Osteoporotic Vertebral Compression Fractures	171		
27	Sham vs. Vertebral Augmentation	174		
	<i>Laxmaiah Manchikanti and Joshua A. Hirsch</i>			
27.1	Introduction	174	27.4	Evidence Based on the Control and the Conduct of the Study
27.2	Current Concepts of Controls in Trials	174	27.5	Conflicting Opinions
27.3	Sham vs. Vertebroplasty	175	27.6	Discussion
27.3.1	Similarities and Differences of Controls	175	27.7	Conclusion
27.3.2	Sham vs. Vertebral Augmentation	176		
28	Treatment of Chronic Vertebral Compression Fractures	182		
	<i>Alexios Kelekis and Dimitrios K. Filippiadis</i>			
28.1	Introduction	182	28.4	Sequela of Chronic Fractures
28.2	Preoperative Evaluation	182	28.5	The Treatment of Chronic VCFs
28.3	Vertebral Osteonecrosis	183	28.6	Conclusion
29	Treatment of Neoplastic Vertebral Compression Fractures	186		
	<i>Kyung-Hoon Kim</i>			
29.1	Introduction	186	29.3	Treatment
29.2	Diagnosis	186	29.3.1	Thoracic and Lumbar Vertebrae
29.2.1	History	186	29.3.2	Sacrum
29.2.2	Physical Examination	186	29.3.3	Cervical vertebrae
29.2.3	Imaging Diagnosis	187	29.4	Controversies
29.2.4	Valuable Scoring Systems for Evaluation of the Patients with Metastatic Bone Lesions	187	29.4.1	Vertebroplasty versus Kyphoplasty
			29.4.2	Increased Risk of VCFs after Radiotherapy ..
			29.5	Conclusion
30	Vertebral Augmentation in Instrumented Spinal Fusions	194		
	<i>John W. Amburgy, Patrick R. Pritchard, Steven M. Theiss, James Mooney, D. Mitchell Self, and M. R. Chambers</i>			
30.1	Introduction	194	30.2	Instrumentation in Spinal Fusion

30.3	Vertebral Augmentation in Spinal Fusion . . .	194	30.5.3	Select High-Risk Patients	195
30.4	Indications	195	30.5.4	Adult Spinal Deformity	196
30.5	Outcomes and Variables	195	30.5.5	Method of Delivery	196
30.5.1	Osteoporosis	195	30.5.6	Thoracolumbar Burst Fractures	198
30.5.2	Revision Surgery	195	30.5.7	Cement	199
			30.6	Conclusion	199
31	Biomechanical Changes after Vertebral Compression Fractures	201			
	<i>Olivier Clerk-Lamallice</i>				
31.1	Introduction	201	31.2.5	Technical Considerations during Vertebral Augmentation: Quantity of Cement to Inject	205
31.2	Current Information based on Recent Literature and State-of-the-Art Practice	201	31.2.6	Biomechanics after Vertebral Augmentation: Adjacent-Level Fracture Risk	205
31.2.1	Physiologic Loads on the Vertebral Body . . .	201	31.3	Key Points	205
31.2.2	Impact of Disk Degeneration on the FSU . . .	202			
31.2.3	Biomechanical Changes after Vertebral Compression Fractures	203			
31.2.4	Technical Considerations during Vertebral Augmentation: Correcting Fracture and FSU-Related Instability	204			
32	Advanced Principles of Minimally Invasive Vertebral Body Stabilization in Severe Benign and Malignant Fractures: Stent-Screw Assisted Internal Fixation	207			
	<i>Alessandro Cianfoni and Luigi La Barbera</i>				
32.1	Introduction	207	32.4	SAIF Technique	210
32.2	Osteoporotic Fractures	207	32.4.1	Osteoporotic Fractures	211
32.3	Neoplastic Osteolysis	209	32.4.2	Neoplastic Osteolysis	212
			32.5	Conclusion	214
33	Cementoplasty Outside the Spine	216			
	<i>Peter L. Munk, Joshua A. Hirsch, Tyler M. Coupal, and Paul I. Mallinson</i>				
33.1	Introduction	216	33.3	Other Sites	219
33.2	Anatomic Sites	217	33.4	Complications	220
33.2.1	Pelvic Cementoplasty	217	33.5	Concomitant Use of Ablative Techniques . . .	220
33.2.2	Technique of Cementoplasty	218	33.6	Conclusion	220
33.2.3	Assessment of Outcome	218	33.7	Key Points	221
33.2.4	Acetabulum/Pelvis	218			
34	Treatment of Osteoporosis after Vertebral Augmentation	223			
	<i>Amanda Schnell, Sarah Morgan, John W. Amburgy, James Mooney, D. Mitchell Self, and M. R. Chambers</i>				
34.1	Introduction	223	34.5	Dual-Energy X-ray Absorptiometry	225
34.2	Etiology and Epidemiology	223	34.6	Vertebral Fracture Assessment	225
34.3	Economic Burden	224	34.7	Radiographs	225
34.4	Presentation and Diagnosis	224	34.8	Trabecular Bone Score	226
