

# PROCESSING COMPOUND VERBS IN PERSIAN

A PSYCHOLINGUISTIC APPROACH  
TO COMPLEX PREDICATES

Pouneh/Shabani-Jadidi

Leiden University Press

# Contents

List of Figures and Tables	8
Acknowledgements	9
List of Abbreviations	10
CHAPTER 1 – Introduction	11
1.1 The Mental Lexicon	11
1.2 Goals of the Present Study	14
1.3 Book Outline	16
CHAPTER 2 – Complex and Compound Word Processing	19
2.1 Hypotheses of Complex and Compound Word Processing	20
2.2 Morphologically Complex Noun Processing	22
2.2.1 The Effect of Stimulus Onset Asynchrony (SOA) on Polymorphemic Word Processing	24
2.2.2 Compound Noun Processing	26
2.3 Processing Morphologically Complex Verbs	28
2.4 Processing of Complex and Compound Words by Aphasic Patients	31
2.4.1 The Distinction between Noun and Verb Processing	34
2.4.2 Noun/Verb Prominence in Aphasic Patients	34
2.4.3 Aphasic Studies on Persian	37
2.5 The Impact of Linguistic and Non-Linguistic Factors on the Processing of Morphologically Complex Words	39
2.5.1 Influence of Linearity on the Priming Effect	40
2.5.2 Influence of Stimulus Onset Asynchrony on the Priming Effect	42
2.5.3 Influence of Frequency on the Priming Effect	43

CHAPTER 5 – General Discussion and Conclusion	123
5.1 Contribution of the Study to the Psycholinguistics Field	125
5.2 Processing of Idiomatic Expressions	129
5.3 Contribution of the Study to the Persian Complex Predicate Field	131
5.4 Conclusion	134
Appendix A – Stimuli for Experiment 1	137
Appendix B – Stimuli for Experiment 2	155
Appendix C – Sample Results of minF' Tests	173
Notes	175
References	179
