<i>Preface</i>	<i>xv</i>
<i>Acknowledgements</i>	<i>xix</i>
<i>Pretest</i>	<i>xx</i>
1 Introduction to Motor Learning and Control	1
Designing Effective Learning Experiences: An Integrative Model	2
Motor Learning, Control, and Performance	4
<i>What is learning?</i>	4
The Nature of Motor Skills	5
<i>Skill Classifications</i>	6
Individual Differences	17
<i>Motor Abilities</i>	17
<i>Categorizing Motor Abilities</i>	20
<i>Practical Implications</i>	20
Putting it into Practice	23
<i>Learning Situation: Rehabilitation of an Ankle Sprain</i>	23
A Look Ahead	24
Focus Points	25
Review Questions	26
References	26
2 Understanding Movement Preparation	27
Theoretical Approaches to Movement Preparation	28
<i>Information Processing Model</i>	28
<i>Ecological Approach</i>	30
Preparing a Response	31
<i>Factors Influencing Reaction Time</i>	33
<i>Response Time Delays: Decision Making versus Movement Execution</i>	44
Putting it into Practice	46
<i>Learning Situation: Learning the Indirect Pass in Hockey</i>	46
A Look Ahead	47

Focus Points	47
Review Questions	48
References	49
3 The Role of Attention, Arousal, and Visual Search in Movement Preparation	51
Attentional Capacity	52
<i>Factors Influencing Attentional Demands</i>	53
Arousal	56
<i>Relationship between Arousal and Performance</i>	56
<i>Arousal and Movement Preparation</i>	57
Selective Attention	60
<i>Directing Attentional Focus: Attentional Styles</i>	60
<i>Practical Implications</i>	62
<i>Directing Attentional Focus: Visual Search</i>	64
Putting it into Practice	70
<i>Learning Situation: Learning the Indirect Pass in Hockey</i>	70
A Look Ahead	71
Focus Points	72
Review Questions	72
References	73
4 Behavioral Theories of Motor Control	77
Coordination and Control	78
Skilled Movement: Central Command Center or Dynamic Interaction?	79
Motor Program Theories	79
<i>Early Theories</i>	79
<i>Generalized Motor Program</i>	79
<i>Evidence Supporting Motor Program Control</i>	88
<i>Summary of Generalized Motor Program Theory</i>	90
Dynamic Interaction Theories	91
<i>Dynamic Systems Theory</i>	91
<i>Non-Linear Pedagogy and the Constraints-Led Approach</i>	101
<i>Summary of Dynamic Systems Theory, Non-Linear Pedagogy, and the Constraints-Led Approach</i>	104
Putting it into Practice	105
<i>Learning Situation: Rehabilitation of an Ankle Sprain</i>	105
A Look Ahead	105

Focus Points	105
Review Questions	106
References	107
5 Neural Mechanisms: Contributions and Control	109
The Nervous System	110
<i>Sensory Receptors</i>	110
<i>Sensory Contributions to Movement</i>	111
Vision	111
<i>Focal and Ambient Vision</i>	114
<i>Vision and Performance</i>	116
Proprioception	120
<i>Proprioception and Performance</i>	122
<i>Balance and Postural Control</i>	123
<i>Rehabilitation and Proprioception Training</i>	124
Transmission of Information: The Spinal Cord	125
<i>Sensory and Motor Pathways</i>	126
<i>Spinal Reflexes</i>	126
<i>Damage to the Spinal Cord</i>	129
The Brain	129
<i>Cerebrum</i>	130
<i>Cerebellum</i>	133
<i>Traumatic Brain Injuries and Concussions</i>	134
<i>Neural Plasticity</i>	134
Memory	136
<i>Memory Model</i>	136
<i>Forgetting</i>	139
<i>Practical Implications</i>	139
Putting it into Practice	141
<i>Learning Situation: Rehabilitation of an Ankle Sprain</i>	141
A Look Ahead	141
Focus Points	141
Review Questions	142
References	143
6 Stages of Learning	147
Models of Stages of Learning	147
<i>Fitts and Posner's Three-Stage Model</i>	148
<i>Gentile's Two-Stage Model</i>	151
Learner and Performance Changes	154

<i>Movement Pattern</i>	154
<i>Attention</i>	159
<i>Knowledge and Memory</i>	161
<i>Error Detection and Correction</i>	162
<i>Self-Confidence</i>	162
Measuring Progress	163
<i>Performance Curves</i>	163
<i>Retention and Transfer Tests</i>	167
Performance Plateaus	168
Putting it into Practice	168
<i>Learning Situation: Learning the Indirect Pass in Hockey</i>	168
A Look Ahead	169
Focus Points	169
Review Questions	170
References	170
7 The Learner: Pre-Instruction Considerations	173
Learning Styles	174
<i>Perceptual Mode</i>	176
<i>Accommodating Your Learners</i>	178
Transfer of Learning	180
<i>Types of Transfer</i>	180
<i>Theories of Transfer</i>	181
<i>Transfer and Instructional Design</i>	183
Motivation	189
<i>Motivation to Learn</i>	189
<i>Motivation to Practice</i>	189
Putting it into Practice	192
<i>Learning Situation: Rehabilitation of an Ankle Sprain</i>	192
A Look Ahead	192
Focus Points	192
Review Questions	193
References	194
8 Skill Presentation	197
Hands-On versus Hands-Off	198
Hands-On or Direct Instruction	198
<i>Verbal Instructions</i>	199
<i>Demonstrations</i>	209
<i>Manual Guidance</i>	221

Hands-Off Instruction	221
<i>Manipulating Task and/or Practice Constraints</i>	222
Putting it into Practice	226
<i>Learning Situation: Learning the Indirect Pass in Hockey</i>	226
A Look Ahead	226
Focus Points	227
Review Questions	228
References	228
9 Principles of Practice Design	233
Breaking Down Skills: Progressions and Sequencing	234
<i>Whole versus Part Practice</i>	234
Speed–Accuracy Tradeoff	243
Bilateral Transfer	248
Psychological Strategies	250
<i>Goal Setting</i>	250
<i>Mental Practice</i>	253
Putting it into Practice	258
<i>Learning Situation: Learning the Indirect Pass in Hockey</i>	258
A Look Ahead	259
Focus Points	259
Review Questions	260
References	260
10 Practice Schedules	265
Practice Context	266
<i>Support for Variable Practice</i>	267
<i>Variable Practice Guidelines</i>	268
<i>Organizing the Practice Session: Contextual Interference</i>	270
Practice Distribution	277
<i>Massed versus Distributed Practice</i>	277
<i>Practical Implications</i>	279
Self-Control of Practice Variables	279
Maximizing Time on Task	280
<i>Rest Intervals</i>	281
<i>Equipment Substitutions</i>	281
<i>Drill Design</i>	282
Putting it into Practice	283
<i>Learning Situation: Rehabilitation of an Ankle Sprain</i>	283

A Look Ahead	284
Focus Points	284
Review Questions	285
References	286
11 Diagnosing Errors	291
Skill Analysis	292
Planning an Observation	293
<i>Identify the Skill's Purpose and Key Elements</i>	293
<i>Determine the Viewing Perspective</i>	293
<i>Decide on the Number of Observations</i>	294
<i>Consider Using Video</i>	295
Determining the Cause of an Error and its Resolution	296
<i>Errors Due to Individual, Task, or Environmental Constraints</i>	297
<i>Comprehension Errors</i>	298
<i>Response Selection Errors</i>	299
<i>Execution Errors</i>	301
<i>Sensory Errors</i>	303
Should the Error be Corrected?	304
<i>Is the Learner Capable?</i>	304
<i>How Much Time is Needed?</i>	304
<i>Is the Learner Motivated to Make the Correction?</i>	306
Putting it into Practice	307
<i>Learning Situation: Learning the Indirect Pass in Hockey</i>	307
A Look Ahead	307
Focus Points	307
Review Questions	308
References	309
12 Correcting Errors	311
Types of Feedback	312
Functions of Augmented Feedback	313
1. <i>Error Correction</i>	313
2. <i>Motivation</i>	314
3. <i>Reinforcement</i>	315
Sources of Augmented Feedback	316
<i>Auditory Sources</i>	316
<i>Biofeedback</i>	317
<i>Visual Displays and Observational Interventions</i>	318

<i>Equipment and Drills</i>	321
Content of Augmented Feedback	322
<i>Error versus Correct Feedback</i>	323
<i>Descriptive versus Prescriptive Feedback</i>	324
<i>Precision of Augmented Feedback</i>	326
Frequency of Augmented Feedback	326
<i>The Guidance Hypothesis</i>	326
<i>Feedback Frequency Reduction Strategies</i>	327
Timing of Augmented Feedback	330
<i>Feedback–Delay Interval</i>	331
<i>Post-Feedback Interval</i>	332
Manipulating Task Constraints	333
Putting it into Practice	333
<i>Learning Situation: Rehabilitation of an Ankle Sprain</i>	333
A Look Ahead	333
Focus Points	334
Review Questions	335
References	335
Epilogue: Teaching Scenarios	341
Scenarios	342
<i>Physical Education</i>	342
<i>Rehabilitation</i>	344
Answers	345
<i>Physical Education Scenario</i>	345
<i>Rehabilitation Scenario</i>	347
<i>Glossary</i>	349
<i>Index</i>	361
