Contents

1	Introduction	1
2	The Control Function Approach to Dealing with Endogeneity for Models with Constant Coefficients: Basic Framework	5
2.1	The Case of i.i.d. Disturbances	5
2.2	The Case of GARCH(1,1) Disturbances	9
2.3	The Case of Serially Correlated Regressors and Disturbances	11
2.4	A Note on the Errors-in-Variables Problem in Rational Expectations Models and Moving-Average Disturbances	15
2.5	Testing for Endogeneity	17
3	Markov-Switching Models with Endogenous Regressors	19
3.1	When the Relationship Between Endogenous Variables and Instrumental Variables is Time-Invariant: Basic Idea	20
3.2	When the Relationship Between Endogenous Variables and Instrumental Variables is Markov-Switching: A Common Latent State Variable	27

3.3	When the Relationship Between Endogenous Variables and Instrumental Variables is Markov-Switching: Two Potentially Correlated Latent State Variables	31
3.4	When the Relationship Between Endogenous Variables and Instrumental Variables is Markov-Switching: Further Generalization	39
3.5	Application #1: Is the Backward-Looking Component Important in a New Keynesian Phillips Curve?	45
3.6	Application #2: The Nature of the Structural Break in the Excess Sensitivity of Consumption to Income	50
4	Markov-Switching Models with Endogenous Switching: When the State Variable and Regression Disturbance are Correlated	53
4.1	Model Specification	54
4.2	Derivation of the Hamilton Filter and the Log-Likelihood Function	55
4.3	An Example in Finance: A Volatility Feedback Model of Stock Returns	58
5	Time-Varying Parameter Models with Endogenous Regressors	65
5.1	When the Relation Between the Endogenous Variables and Instrumental Variables is Time-Invariant	67
5.2	When the Relation Between the Endogenous Variables and Instrumental Variables is Time-Varying	73
5.3	When the Relation Between the Endogenous Variables and Instrumental Variables is Time-Varying: An Alternative Two-Step Approach and a Practical Solution When K is Large	79
5.4	Generalization and an Application: Estimation of a Forward-Looking Monetary Policy Rule with Time-Varying Responses to Inflation and Output Gap	85

6 Concluding Remarks 97
