Preface	v
List of symbols	ix
1 Convolutions and Mollifiers	1
1.1 Approximation by continuous functions in $L_2(G)$	1
1.2 Properties of convolutions	6
1.3 Mollifiers	13
1.4 Approximation by smooth functions in $L_2(G)$	15
1.5 Weyl's Lemma on harmonic functions	16
2 Sobolev Spaces on One-Dimensional Intervals	21
2.1 Sobolev spaces as completions of dense sets	22
2.2 Imbedding and trace theorems	25
2.3 An extension theorem and inequalities	35
2.4 Sobolev spaces of periodic functions	42
3 Sobolev Spaces $H^m(G)$ on Domains G in \mathbb{R}^n	49
3.1 $H^m(G)$ as completion of $C^m(G)$	49
3.2 The Sobolev space $H^m(\mathbb{R}^n)$	53
3.3 Traces of functions defined on a half-space	58
3.4 Sobolev spaces $H^m(G)$ for Lipschitz domains G	59
4 The Inequalities of Poincaré and Friedrichs	67
4.1 The compact imbedding of $H^m(G)$ into $H^{m-1}(G)$	67
4.2 Poincaré's inequality	72
4.3 The trace operator for Lipschitz domains G	77
4.4 Friedrichs' inequality	82
5 Extension Theorems	85
5.1 The Calderón–Zygmund inequality	85
5.2 An extension operator	90
5.3 Calderón's extension theorem	94

6 Imbeddings of $H^m(G)$	97
6.1 The imbedding of $H^m(G)$ into $C(G)$	97
6.2 Compactness of the imbedding of $H^m(G)$ into $C(G)$	105
7 Elliptic Boundary Value Problems	111
7.1 Boundary value problems with elliptic differential operators	111
7.2 V -elliptic bilinear forms.	115
7.3 Weak forms of elliptic boundary value problems	119
7.4 Examples of elliptic boundary value problems of order 2 and 4	122
7.5 Weak and classical solutions of the Poisson problem	134
7.6 Examples concerning the regularity of the solution of a Poisson problem	145
7.7 Regularity for the Poisson problem for convex polygonal domains.	154
8 The Finite Element Method for the Solution of Elliptic Boundary Value Problems	165
8.1 Piecewise-polynomial functions in $C^{k-1}(\bar{G})$	165
8.2 Approximation in $H^k(G)$ by piecewise-polynomial functions	177
8.3 Numerical solution of elliptic boundary value problems by the finite element method	181
8.4 Computation of the matrix elements	184
8.5 Explicit numerical solution of a two-dimensional Poisson problem.	191
8.6 An example for the approximate solution of a variational problem.	195
8.7 Convergence properties of the finite element method	199
References	205
Subject Index	208
