<b>Acknowledgments</b>	<b>xi</b>
<b>1 Introduction</b>	<b>1</b>
<b>2 CAT(0) Cube Complexes</b>	<b>3</b>
2.a Basic Definitions	3
2.b Right-Angled Artin Groups	3
2.c Hyperplanes in CAT(0) Cube Complexes	4
2.d Geodesics and the Metric	4
2.e Properties of Minimal Area Cubical Disk Diagrams	5
2.f Convexity	12
2.g Hyperplanes and Their Carriers	13
2.h Splaying and Rectangles	17
2.i Annuli	20
2.j Annular Diagrams and Malnormality	22
2.k Convex Cores	24
2.l Superconvexity	27
<b>3 Cubical Small-Cancellation Theory</b>	<b>30</b>
3.a Introduction	30
3.b Cubical Presentations	31
3.c Pieces	33
3.d Some Small-Cancellation Conditions to Bear in Mind	37
3.e Disk Diagrams and Reduced Disk Diagrams	37
3.f Rectified Disk Diagrams	44
3.g Gauss-Bonnet Theorem	50
3.h Assigning the Angles	51
3.i Nonpositive Curvature of Shards	54
3.j Tables of Small Shards	58
3.k Nonpositive Curvature of Cone-Cells via Small-Cancellation	58
3.l Internal Cone-Cells That Do Not Self-Collide	64
3.m More General Small-Cancellation Conditions and Involved Justification	67
3.n Informal Discussion of the Limits of the Theory	69
3.o Nonpositively Curved Angling Rules	70

3.p	Positive Curvature along Boundary	71
3.q	Ladder Theorem	72
3.r	Trichotomy for Reduced Diagrams	76
3.s	Examples	76
3.t	Examples Arising from Special Cube Complexes	78
3.u	Graded Small-Cancellation	80
3.v	Some Graded Examples	81
3.w	Graded Metric Small-Cancellation	82
3.x	Missing Shells and Injectivity	86
3.y	Short Innerpaths and Quasiconvexity	89
<b>4</b>	<b>Torsion and Hyperbolicity</b>	<b>94</b>
4.a	Cones Embed	94
4.b	Torsion	94
4.c	Hyperbolicity	97
<b>5</b>	<b>New Walls and the <math>B(6)</math> Condition</b>	<b>99</b>
5.a	Introduction	99
5.b	Total Defects of Paths in Cones	99
5.c	Generalization of the $B(6)$ Condition	100
5.d	Cyclic Quotients and the $B(6)$ Condition	102
5.e	Embedding Properties of the Cones and Hyperplane Carriers	103
5.f	Defining Immersed Walls in $X^*$	109
5.g	No Inversions	120
5.h	Carriers and Quasiconvexity	121
5.i	Bigons	130
5.j	Square Cones	133
5.k	1-Dimensional Linear Separation	136
5.l	Obtaining Proper Actions on the Dual	138
5.m	Codimension-1 Subgroup Preserved	147
5.n	Elliptic Annuli	148
5.o	Annular Diagrams and the $B(8)$ Condition	151
5.p	Doubly Collared Annular Diagrams	157
5.q	Malnormality of Wall Stabilizers	161
5.r	Artin Groups	164
<b>6</b>	<b>Special Cube Complexes</b>	<b>166</b>
6.a	Immersed Hyperplanes	166
6.b	Hyperplane Definition of Special Cube Complex	166
6.c	Right-Angled Artin Group Characterization	167
6.d	Canonical Completion and Retraction	168
6.e	Double Cosets and Virtual Specialness	171
6.f	Extensions of Quasiconvex Codimension-1 Subgroups	171
6.g	The Malnormal Combination Theorem	180

<b>7</b>	<b>Cubulations</b>	<b>181</b>
	7.a Wallspaces	181
	7.b Sageev's Construction	182
	7.c Finiteness Properties of the Dual Cube Complex	183
	7.d Virtually Cubulated	187
	7.e Sparse Complexes	189
	7.f Useful Subwallspaces	203
	7.g Cubulating Amalgams	215
<b>8</b>	<b>Malnormality and Fiber-Products</b>	<b>218</b>
	8.a Height and Virtual Almost Malnormality	218
	8.b Fiber-Products	220
	8.c Graded Systems	223
<b>9</b>	<b>Splicing Walls</b>	<b>225</b>
	9.a Finite Cover That Is a Wallspace	225
	9.b Preservation of Small-Cancellation and Obtaining Wall Convexity	226
	9.c Obtaining the Separation Properties for Pseudographs	228
<b>10</b>	<b>Cutting <math>X^*</math></b>	<b>232</b>
	10.a Hierarchies of Cubical Presentations	232
	10.b Inflations	233
	10.c Some Persistent Properties	235
	10.d Additional Splitting along Conepoints	237
<b>11</b>	<b>Hierarchies</b>	<b>242</b>
<b>12</b>	<b>Virtually Special Quotient Theorem</b>	<b>246</b>
	12.a Malnormal Special Quotient Theorem	246
	12.b Proof of the Special Quotient Theorem	249
	12.c Adding Higher Grade Relators	251
	12.d Controlling Intersections in Quotient	255
<b>13</b>	<b>Amalgams of Virtually Special Groups</b>	<b>266</b>
	13.a Virtually Special Amalgams	266
<b>14</b>	<b>Large Fillings Are Hyperbolic and Preservation of Quasiconvexity</b>	<b>272</b>
	14.a Hyperbolic Fillings	272
	14.b Quasiconvex Image	276
<b>15</b>	<b>Relatively Hyperbolic Case</b>	<b>281</b>
	15.a Introduction	281
	15.b Parabolic Fillings That Are Virtually Special	283

15.c	Separability for Relatively Hyperbolic Hierarchies	286
15.d	Residually Verifying the Double Coset Criterion	287
15.e	Relative Malnormality and Separability	291
15.f	The Hierarchy in the Relatively Hyperbolic Setting	292
<b>16</b>	<b>Largeness and Omnipotence</b>	<b>304</b>
16.a	Virtual Separation and Largeness	304
16.b	Omnipotence	306
<b>17</b>	<b>Hyperbolic 3-Manifolds with a Geometrically Finite Incompressible Surface</b>	<b>310</b>
17.a	Some Background on 3-Manifolds	311
17.b	Aparabolic Hierarchy	313
17.c	Virtual Specialness of Hyperbolic 3-Manifolds with Boundary	314
17.d	Cutting All Tori with First Surface	316
<b>18</b>	<b>Limit Groups and Abelian Hierarchies</b>	<b>321</b>
18.a	Limit Groups	321
18.b	Abelian Hierarchies	325
<b>19</b>	<b>Application Towards One-Relator Groups</b>	<b>333</b>
19.a	Overview	333
19.b	The Magnus-Moldavanskii Hierarchy	334
19.c	Quasiconvexity Using the Strengthened Spelling Theorem	337
19.d	Staggered 2-Complex with Torsion	340
<b>20</b>	<b>Problems</b>	<b>343</b>
	<b>References</b>	<b>345</b>
	<b>Index</b>	<b>353</b>
