|---|-----------|
| <i>Symbols</i>                                | xiii      |
| <i>Introduction</i>                           | xv        |
| <b>Part 1 Studying Abstract Algebra</b>       |           |
| <b>1 What is Abstract Algebra?</b>            | <b>3</b>  |
| 1.1 What is abstract about Abstract Algebra?  | 3         |
| 1.2 What is algebraic about Abstract Algebra? | 4         |
| 1.3 Approaches to Abstract Algebra            | 7         |
| <b>2 Axioms and Definitions</b>               | <b>13</b> |
| 2.1 Mathematical axioms and definitions       | 13        |
| 2.2 Relating definitions to examples          | 17        |
| 2.3 The definition of <i>group</i>            | 21        |
| 2.4 Commutativity and rings                   | 25        |
| 2.5 Mathematical objects and notation         | 28        |
| <b>3 Theorems and Proofs</b>                  | <b>31</b> |
| 3.1 Theorems and proofs in Abstract Algebra   | 31        |
| 3.2 Logic in familiar algebra                 | 35        |
| 3.3 Modular arithmetic                        | 39        |
| 3.4 Equivalence classes                       | 44        |
| 3.5 Logic in theorems                         | 51        |
| 3.6 Self-explanation training                 | 56        |
| 3.7 Writing proofs                            | 60        |
| <b>4 Studying Abstract Algebra</b>            | <b>67</b> |
| 4.1 Who are you as a student?                 | 67        |
| 4.2 Myths about learning                      | 68        |
| 4.3 Effective learning                        | 74        |

## Part 2 Topics in Abstract Algebra

|          |                                       |            |
|----------|---------------------------------------|------------|
| <b>5</b> | <b>Binary Operations</b>              | <b>79</b>  |
| 5.1      | What is a binary operation?           | 79         |
| 5.2      | Associativity and commutativity       | 81         |
| 5.3      | Modular arithmetic                    | 84         |
| 5.4      | Binary operations on functions        | 91         |
| 5.5      | Matrices and transformations          | 93         |
| 5.6      | Symmetries and permutations           | 96         |
| 5.7      | Binary operations as functions        | 101        |
| <b>6</b> | <b>Groups and Subgroups</b>           | <b>105</b> |
| 6.1      | What is a group?                      | 105        |
| 6.2      | What is a subgroup?                   | 108        |
| 6.3      | Cyclic groups and subgroups           | 112        |
| 6.4      | Cyclic subgroups and generators       | 116        |
| 6.5      | Theorems about cyclic groups          | 119        |
| 6.6      | Groups of familiar objects            | 123        |
| 6.7      | The dihedral group $D_3$              | 127        |
| 6.8      | More symmetry groups                  | 132        |
| 6.9      | Permutation groups                    | 136        |
| 6.10     | Identifying and defining subgroups    | 141        |
| 6.11     | Small groups                          | 145        |
| <b>7</b> | <b>Quotient Groups</b>                | <b>151</b> |
| 7.1      | What is a quotient group?             | 151        |
| 7.2      | Quotient groups in cyclic groups      | 154        |
| 7.3      | Element-coset commutativity           | 158        |
| 7.4      | Left and right cosets                 | 163        |
| 7.5      | Normal subgroups: theory              | 167        |
| 7.6      | Normal subgroups: examples            | 171        |
| 7.7      | Lagrange's Theorem                    | 176        |
| <b>8</b> | <b>Isomorphisms and Homomorphisms</b> | <b>183</b> |
| 8.1      | What is an isomorphism?               | 183        |
| 8.2      | Isomorphism definition                | 186        |
| 8.3      | Early isomorphism theory              | 192        |
| 8.4      | Example isomorphisms                  | 197        |

|          |   |            |
|----------|---|------------|
| 8.5      | Isomorphic or not?                            | 202        |
| 8.6      | Homomorphisms                                 | 205        |
| 8.7      | The First Isomorphism Theorem                 | 212        |
| <b>9</b> | <b>Rings</b>                                  | <b>219</b> |
| 9.1      | What is a ring?                               | 219        |
| 9.2      | Examples of rings                             | 222        |
| 9.3      | Simple ring theorems                          | 228        |
| 9.4      | Rings, integral domains and fields            | 231        |
| 9.5      | Units, zero divisors and equations            | 235        |
| 9.6      | Subrings and ideals                           | 242        |
| 9.7      | Ideals, quotient rings and ring homomorphisms | 248        |
|          | <i>Conclusion</i>                             | 257        |
|          | <i>Bibliography</i>                           | 263        |
|          | <i>Index</i>                                  | 277        |
