Part I The Problem Studied in This Book

1 Introduction	3
1.1 The Euler Equations	3
1.2 Weak Solutions and Admissibility	6
1.3 Overview on Well-Posedness Results	8
1.4 Structure of This Book	11
2 Hyperbolic Conservation Laws	13
2.1 Formulation of a Conservation Law	13
2.2 Initial Boundary Value Problem	17
2.3 Hyperbolicity	18
2.4 Companion Laws and Entropies	19
2.5 Admissible Weak Solutions	21
3 The Euler Equations as a Hyperbolic System of Conservation Laws	27
3.1 Barotropic Euler System	28
3.1.1 Hyperbolicity	29
3.1.2 Entropies	29
3.1.3 Admissible Weak Solutions	35
3.2 Full Euler System	37
3.2.1 Hyperbolicity	37
3.2.2 Entropies	38
3.2.3 Admissible Weak Solutions	47

Part II Convex Integration

4 Preparation for Applying Convex Integration to Compressible Euler	51
4.1 Outline and Preliminaries	51
4.1.1 Adjusting the Problem	51
4.1.2 Tartar's Framework	52

4.1.3	Plane Waves and the Wave Cone	53
4.1.4	Sketch of the Convex Integration Technique	54
4.2	Λ -Convex Hulls	57
4.2.1	Definitions and Basic Facts	57
4.2.2	The H_N -Condition and a Way to Define \mathcal{U}	58
4.2.3	The Λ -Convex Hull of Slices	62
4.2.4	The Λ -Convex Hull if the Wave Cone is Complete	64
4.3	The Relaxed Set \mathcal{U} Revisited	70
4.3.1	Definition of \mathcal{U}	70
4.3.2	Computation of \mathcal{U}	70
4.4	Operators	79
4.4.1	Statement of the Operators	79
4.4.2	Lemmas for the Proof of Proposition 4.4.1	80
4.4.3	Proof of Proposition 4.4.1	87
5	Implementation of Convex Integration	91
5.1	The Convex-Integration-Theorem	91
5.1.1	Statement of the Theorem	91
5.1.2	Functional Setup	95
5.1.3	The Functionals I_{Γ_0} and the Perturbation Property	96
5.1.4	Proof of the Convex-Integration-Theorem	103
5.2	Proof of the Perturbation Property	105
5.2.1	Lemmas for the Proof	106
5.2.2	Proof of Lemma 5.2.4	111
5.2.3	Proof of Lemma 5.2.1 Using Lemmas 5.2.2, 5.2.3 and 5.2.4	127
5.2.4	Proof of the Perturbation Property Using Lemma 5.2.1	130
5.3	Convex Integration with Fixed Density	137
5.3.1	A Modified Version of the Convex-Integration-Theorem ...	137
5.3.2	Proof the Modified Perturbation Property	138
 Part III Application to Particular Initial (Boundary) Value Problems		
6	Infinitely Many Solutions of the Initial Boundary Value Problem for Barotropic Euler	147
6.1	A Simple Result on Weak Solutions	148
6.2	Possible Improvements to Obtain Admissible Weak Solutions	149
6.3	Further Possible Improvements	151
7	Riemann Initial Data in Two Space Dimensions for Isentropic Euler	153
7.1	One-Dimensional Self-Similar Solution	155
7.2	Summary of the Results on Non-/Uniqueness	159

7.3	Non-Uniqueness Proof if the Self-Similar Solution Consists of One Shock and One Rarefaction	161
7.3.1	Condition for Non-Uniqueness	161
7.3.2	The Corresponding System of Algebraic Equations and Inequalities	167
7.3.3	Simplification of the Algebraic System	171
7.3.4	Solution of the Algebraic System if the Rarefaction is “Small”	173
7.3.5	Proof of Theorem 7.3.1 via an Auxiliary State.....	178
7.4	Sketches of the Non-Uniqueness Proofs for the Other Cases	181
7.4.1	Two Shocks	181
7.4.2	One Shock	181
7.4.3	A Contact Discontinuity and at Least One Shock.....	181
7.5	Other Results in the Context of the Riemann Problem	182
8	Riemann Initial Data in Two Space Dimensions for Full Euler.....	185
8.1	One-Dimensional Self-Similar Solution	186
8.2	Summary of the Results on Non-/Uniqueness	189
8.3	Non-Uniqueness Proof if the Self-Similar Solution Contains Two Shocks	190
8.3.1	Condition for Non-Uniqueness	191
8.3.2	The Corresponding System of Algebraic Equations and Inequalities	195
8.3.3	Solution of the Algebraic System.....	198
8.4	Sketches of the Non-Uniqueness Proofs for the Other Cases	207
8.4.1	One Shock and One Rarefaction	207
8.4.2	One Shock	207
8.5	Other Results in the Context of the Riemann Problem	207
A	Notation and Lemmas	209
A.1	Sets	209
A.2	Vectors and Matrices	209
A.2.1	General Euclidean Spaces.....	209
A.2.2	The Physical Space and the Space-Time	212
A.2.3	Phase Space	213
A.3	Sequences	213
A.4	Functions.....	213
A.4.1	Basic Notions	213
A.4.2	Differential Operators	214
A.4.3	Function Spaces	216
A.4.4	Integrability Conditions	218
A.4.5	Boundary Integrals and the Divergence Theorem.....	219
A.4.6	Mollifiers.....	221
A.4.7	Periodic Functions.....	221

A.5	Convexity	223
A.5.1	Convex Sets and Convex Hulls	223
A.5.2	Convex Functions.....	225
A.6	Semi-Continuity	226
A.7	Weak-* Convergence in L^∞	227
A.8	Baire Category Theorem	230
