

Contents

Chapter 1. Introduction	1
1.1. Short General Introduction	1
1.2. Asymptotic Counting Results	2
1.3. Examples	8
1.4. Statistical Results	10
1.5. Historical Overview of Applications and Examples	14
Chapter 2. Attracting Conformal Graph Directed Markov Systems	17
2.1. Thermodynamic Formalism of Subshifts of Finite Type with Countable Alphabet; Preliminaries	17
2.2. Attracting Conformal Countable Alphabet Graph Directed Markov Systems (GDMSs) and Countable Alphabet Attracting Iterated Function Systems (IFSs); Preliminaries	21
2.3. Complex Ruelle–Perron–Frobenius Operators; Spectrum and D–Genericity	26
2.4. Asymptotic Results for Multipliers; Statements and First Preparations	34
2.5. Complex Localized Poincaré Series η_ρ	40
2.6. Asymptotic Results for Multipliers; Concluding of Proofs	43
2.7. Asymptotic Results for Diameters	50
Chapter 3. Parabolic Conformal Graph Directed Markov Systems	59
3.1. Parabolic GDMS; Preliminaries	59
3.2. Poincaré’s Series for \mathcal{S}^* , the Associated Countable Alphabet Attracting GDMS	64
3.3. Asymptotic Results for Multipliers	66
3.4. Asymptotic Results for Diameters	73
Chapter 4. Central Limit Theorems	81
4.1. Central Limit Theorems for Multipliers and Diameters: Attracting GDMSs with Invariant Measure μ_{δ_S}	81
4.2. Central Limit Theorems for Multipliers and Diameters: Parabolic GDMSs with Finite Invariant Measure μ_{δ_S}	83
4.3. Central Limit Theorems: Asymptotic Counting Functions for Attracting GDMSs	86
4.4. Central Limit Theorems: Asymptotic Counting Functions for Parabolic GDMSs	89
Chapter 5. Examples and Applications, I	95
5.1. Attracting/Expanding Conformal Dynamical Systems	95
5.2. Conformal Parabolic Dynamical Systems	105

Chapter 6. Examples and Applications, II: Kleinian Groups	113
6.1. Finitely Generated Classical Schottky Groups with no Tangencies	113
6.2. Generalized (allowing tangencies) Classical Schottky Groups	120
6.3. Fuchsian Groups	129
Bibliography	135
