Chapter 1. Introduction	1
1.1. Historical background	1
1.2. Charge transfer model and main results	4
1.3. Main ideas	8
Notation	10
Organization	10
Acknowledgment	11
Chapter 2. Preliminaries	13
2.1. Strichartz estimates and local energy decay	13
2.2. Lorentz Transformations and Energy	18
Chapter 3. Estimates along Slanted Lines	23
3.1. Free wave equations	23
3.2. Wave equations with stationary potentials	24
Chapter 4. Endpoint Reversed Strichartz Estimates	33
4.1. Bootstrap argument	34
4.2. Bound states	35
4.3. Decomposition into channels	39
4.4. Analysis of the three channels	41
4.5. Conclusion	47
Chapter 5. Strichartz Estimates and Energy Bound	49
Chapter 6. Inhomogeneous Estimates	59
6.1. Scattering states	59
6.2. Inhomogeneous local decay estimate and Strichartz estimates	61
6.3. Reversed endpoint Strichartz estimates with inhomogeneous terms in reversed norms	66
6.4. Reversed type local decay estimates	74
Chapter 7. Scattering	79
Bibliography	83
