<i>Acknowledgments</i>	vii
<i>Introduction</i>	1
Part I: Ghosts of Departed Quantities	
1. Automating Knowledge	37
2. Can Computers Do Math?	59
3. Algorithms of Objectification	77
Part II: The Promise of Frequentist Knowledge	
4. Do Dead Fish Believe in God?	101
5. Induction, Behavior and the Fractured Edifice of Frequentism	115
Part III: Bayesian Dreams	
6. Bayesian Statistics and the Problem with Frequentism	143
7. Bayesian Metaphysics and the Foundation of Knowledge	158

8. Automated Abstractions and Alienation 177

Conclusion: Toward a Revolutionary Mathematics 217
