Introduction	1
1 Proposition-Constituent Analysis and the Decomposition of Idealism	6
1.1 Russell's break with idealism	6
1.2 Transcendental deductions	17
1.3 Internal relations and the contradiction of relativity	29
2 Relations in Analysis	38
2.1 External relations and the diversity of logical subjects	38
2.2 Intensional relations and analysis	68
3 Logicism and the Analysis of Mathematical Propositions	79
3.1 Logicism and existing mathematics	79
3.2 The form of implications and the role of explicit definitions	88
3.3 The logic of Russell's logicism and the contradiction	101
4 Logic and Analysis in Russell's Definition of Number	112
4.1 Russell's and Frege's logicist definitions of number	112
4.2 Russell's rejection of Frege's (amended) definition	124
5 Toward a New Theory of Denoting	144
5.1 Familiar woes: <i>denoting</i> concepts	144
5.2 Mathematical functions and denoting complexes	156
Conclusion	173
<i>Notes</i>	179
<i>Bibliography</i>	205
<i>Index</i>	213
