

Contents

Preface	vii
Numerical reconstruction of curves from their Jacobians DANIELE AGOSTINI, TÜRKÜ ÖZLÜM ÇELİK, and DEMİR EKEN	1
A strategy to optimize the complexity of Chudnovsky-type algorithms over the projective line STÉPHANE BALLEZ, ALEXIS BONNECAZE, and BASTIEN PACIFICO	13
On the constant $D(q)$ defined by Homma PETER BEELEN, MARIA MONTANUCCI, and LARA VICINO	33
How big is the image of the Galois representations attached to CM elliptic curves? FRANCESCO CAMPAGNA and RICCARDO PENGO	41
Multiradical isogenies WOUTER CASTRYCK and THOMAS DECRU	57
Arithmetic monodromy groups of dynamical Belyi maps ÖZLEM EJDER	91
Automorphisms and isogeny graphs of abelian varieties, with applications to the superspecial Richelot isogeny graph ENRICH FLORIT and BENJAMIN SMITH	103
Frobenius structures on hypergeometric equations KIRAN S. KEDLAYA	133
The regulator dominates the rank FABIEN PAZUKI	159
Introduction to Drinfeld modules BJORN POONEN	167
