

## Contents

Preface	vii
A quasi-Poisson structure on the multiplicative Grothendieck–Springer resolution ANA BĂLIBANU	1
Volumes of definable sets in o-minimal expansions and affine GAGA theorems PATRICK BROSNAN	15
Hessenberg varieties and Poisson slices PETER CROOKS and MARKUS RÖSER	25
Geometry of logarithmic derivations of hyperplane arrangements GRAHAM DENHAM and AVI STEINER	59
Shift of argument algebras and de Concini–Procesi spaces IVA HALACHEVA	79
Projection spaces and twisted Lie algebras BEN KNUDSEN	95
Cohomology, Bocksteins, and resonance varieties in characteristic 2 ALEXANDRU I. SUCIU	131
