Chapter 1. Introduction	1
1.1. Formulation of the problem	2
1.2. Scheme of the proof	10
1.3. Comparison with previous KAM results	15
Acknowledgments	19
Chapter 2. Functional setting	21
2.1. Function spaces	21
2.2. Linear operators	22
2.3. Hamiltonian and translation invariant operators	32
Chapter 3. Normal forms and integrability properties of the pure gravity water waves	37
3.1. Hamiltonian structure of water waves	37
3.2. Comparison among Birkhoff normal form procedures	40
3.3. Approximate constant of motion for the gravity water waves	43
3.4. Identification of normal forms	45
Chapter 4. Weak Birkhoff normal form	49
4.1. Resonances	50
4.2. Proof of Proposition 4.3	52
Chapter 5. The nonlinear functional setting	53
5.1. Action-angle variables	53
5.2. The functional equation	56
Chapter 6. Approximate inverse	61
Chapter 7. The linearized operator in the normal directions	67
7.1. Homogeneity expansions	69
7.2. Hamiltonian structure of the linearized operator	72
7.3. Algebraic properties of the linearized operator	73
Chapter 8. Symmetrization of the linearized operator at the highest order	75
8.1. Good unknown of Alinhac	75
8.2. Complex formulation of water waves	77
Chapter 9. Block-diagonalization	79
9.1. Block-diagonalization at order $1/2$	79
9.2. Block-diagonalization at negative orders	82
Chapter 10. Reduction at the highest orders	87

10.1. Integrability at order 1	88
10.2. Integrability at order 1/2	96
10.3. Integrability at order zero	102
Chapter 11. Linear Birkhoff normal form	109
11.1. Preliminary technical results	110
11.2. Terms $O(\varepsilon), O(\varepsilon^2)$ and identification of normal forms	114
11.3. Terms $O(\varepsilon^{\geq 3})$ : Analysis of high modes	121
11.4. Terms $O(\varepsilon^{\geq 3})$ : Analysis of low modes	122
Chapter 12. Inversion of the linearized operator	125
Chapter 13. The Nash–Moser nonlinear iteration	129
13.1. Measure estimates	132
13.2. Conclusion of the Proof of Theorem 5.6	136
Appendix A. Flows and conjugations	137
A.1. Flows of pseudo differential PDEs	137
A.2. Egorov theory and conjugation rules	140
Appendix B. Technical lemmata	147
B.1. Dirichlet–Neumann operator	147
B.2. Technical lemmata of Chapter 11	150
Bibliography	155
