

Contents

1	An Overview	1
1.1	Introduction	1
1.2	Faltings Topos	4
1.3	Local Theory. The Torsor of Deformations	6
1.4	Global Theory. Dolbeault Modules	13
1.5	Functoriality of the p -adic Simpson Correspondence by Proper Direct Image	21
1.6	Relative Faltings Topos	25
2	Preliminaries	27
2.1	Notation and Conventions	27
2.2	Reminder on a Construction by Fontaine–Grothendieck	31
2.3	Fontaine Universal p -adic Infinitesimal Thickenings	34
2.4	Logarithmic Infinitesimal Thickenings	41
2.5	Higgs Modules and λ -connections	46
2.6	Ind-objects of a Category	59
2.7	Ind-modules	65
2.8	Higgs Ind-modules and λ -connections	75
2.9	Modules up to Isogeny	87
2.10	Complement on the Functoriality of Generalized Covanishing Topos	96
3	The p-adic Simpson Correspondence and Hodge–Tate Modules.	
	Local Study	111
3.1	Assumptions and Notation. p -adic Infinitesimal Deformations	111
3.2	Torsors and Higgs–Tate Algebras	119
3.3	Dolbeault Representations	142
3.4	Small Higgs Modules	150
3.5	Hodge–Tate Representations	165
4	The p-adic Simpson Correspondence and Hodge–Tate Modules.	
	Global Study	169
4.1	Assumptions and Notation	169
4.2	Higgs Modules	171

4.3	Faltings Topos	176
4.4	Higgs–Tate Algebras in Faltings Topos	189
4.5	Dolbeault ind -modules	214
4.6	Dolbeault $\overline{\mathcal{B}}_{\mathbb{Q}}$ -modules	229
4.7	Cohomology of Dolbeault ind -modules	241
4.8	Dolbeault Modules Over a Small Affine Scheme	244
4.9	Pullback of a Dolbeault ind -module by an Étale Morphism	259
4.10	Stacky Properties of Dolbeault Modules	269
4.11	Hodge–Tate Modules	276
4.12	Dolbeault and Hodge–Tate Local Systems	279
5	Relative Cohomologies of Higgs–Tate Algebras. Local Study	283
5.1	Assumptions and Notation. Review of Relative Galois Cohomology	283
5.2	Relative Galois Cohomologies of Higgs–Tate Algebras	295
5.3	Relative Dolbeault Cohomology of Higgs–Tate Algebras	327
6	Relative Cohomology of Dolbeault Modules	331
6.1	Assumptions and Notation. Relative Faltings Topos	331
6.2	Base Change	352
6.3	Functoriality of Higgs–Tate algebras in Faltings Topos	365
6.4	Cohomological Computations	384
6.5	Relative Cohomology of Dolbeault ind -modules	402
	Errata and Addenda to “The p-adic Simpson Correspondence”	425
	References	433
