Introduction	1
Acknowledgments	4
Chapter 1. Abstract representation rings	5
1.1. Axioms for representation rings	5
1.2. Ordinary representation theory	8
1.3. Representation ideals and cores	10
1.4. The gamma invariant	12
1.5. Pringsheim's Theorem	14
1.6. Submultiplicative sequences	15
1.7. The endotrivial group	18
1.8. Elements with small gamma invariant	19
1.9. Algebraic elements	21
1.10. The maximal quotient	22
Chapter 2. Commutative Banach algebras	25
2.1. Banach spaces	25
2.2. Banach algebras	27
2.3. Spectrum	28
2.4. Spectral radius	30
2.5. The structure space	32
2.6. Closed ideals and the structure space	33
2.7. Systems of generators	34
2.8. The Jacobson radical	35
2.9. Banach $*$ -algebras	36
2.10. C^* -algebras	39
2.11. Hilbert space	40
Chapter 3. Completions of representation rings	43
3.1. The norm on a representation ring	43
3.2. Norms and cores	44
3.3. Spectrum, species, structure space	45
3.4. Symmetric representation rings	47
3.5. Algebraic elements revisited	47
3.6. Quasi-nilpotent elements	48
3.7. Action on Hilbert space	49
3.8. The C^* -algebra $C_{\max}^*(\mathfrak{a})$	52
3.9. Quasi-nilpotent elements revisited	53
3.10. Idempotents	54

Chapter 4. Representation rings of finite groups	55
4.1. Preliminaries on kG -modules	55
4.2. The representation ring $a(G)$	56
4.3. The gamma invariant	58
4.4. Elementary abelian subgroups	60
4.5. Induced modules	61
4.6. Relatively projective modules and relative syzygies	62
4.7. Trivial source modules	65
4.8. The norms on $a(G)$	66
4.9. Species of $a(G)$	67
4.10. Restriction and induction on $\hat{a}(G)$	68
4.11. Adams psi operations	71
4.12. The Burnside ring	73
Chapter 5. Examples and problems	75
5.1. The two dimensional module for $\mathbb{Z}/5$	75
5.2. The cyclic group of order p	76
5.3. Some Frobenius groups	80
5.4. Cyclic central subgroups	83
5.5. Cyclic p -groups	86
5.6. Cyclic normal subgroups	93
5.7. An integral example	95
5.8. The group $SL(2, q)$	96
5.9. The Klein four group	98
5.10. The alternating group A_4	99
5.11. Dihedral 2-groups	100
5.12. Semidihedral 2-groups	103
5.13. Finite 2-groups	103
5.14. Some Hopf algebras	104
5.15. Some open problems	107
Bibliography	109
Index	115
