

Contents of book

Guided tour of the book	xiv
Preface to the eighth edition	xvi
Introduction	1
1 Data visualisation	11
Learning outcomes	11
Introduction	12
Different types of data	12
Cross-section and time-series data	13
Visualising data on employment and education in the UK	13
The bar chart	14
Good practice when drawing charts	20
The pie chart	20
Visualising working hours in the UK in 2021	22
Another chart of exactly the same data	24
Relative frequency and cumulative frequency distributions	26
Time-series data: investment expenditures 1997–2020	29
Graphing multiple series	31
Graphing bivariate data: the scatter diagram	36
Drawing charts with Python and Jupyter notebooks	40
Guidance to the student: how to measure your progress	42
Summary	43
What's online	43
<i>Key terms and concepts</i>	44
<i>Problems</i>	45
<i>Answers to exercises</i>	50
2 Descriptive statistics	55
Learning outcomes	56
Introduction	56
Types of summary measures	56
Measures of location	57
Measures of dispersion	64
Measuring skewness	69
Summarising time series data	72
Transforming the data	78
Writing statistical reports	78

Rounding	81
What to do now	81
Summary	81
What's online	82
<i>Key terms and concepts</i>	82
<i>Formulae used in this chapter</i>	84
<i>Problems</i>	84
<i>Answers to exercises</i>	87
Appendix 1: Σ notation	88
<i>Problems on Σ notation</i>	89
Appendix 2: Calculating the median from grouped data	90
Appendix 3: Calculating the growth rate based upon continuous compounding	91
3 Probability	93
Learning outcomes	94
Probability theory and statistical inference	94
The definition of probability	95
The frequentist view	95
The subjective view	96
Probability theory: the building blocks	97
Events and their probabilities	99
Compound events	100
Rules for combining events	101
The addition rule	101
The multiplication rule	103
Tree diagrams	104
The multiplication rule and independence	105
Combining the addition and multiplication rules	108
Combinations and permutations	110
Bayes' theorem	111
Prior and posterior probabilities	113
Summary	114
What's online	115
<i>Key terms and concepts</i>	115
<i>Formulae used in this chapter</i>	116
<i>Problems</i>	116
<i>Answers to exercises</i>	120
Appendix: Why does the combinatorial formula work?	124
4 Probability distributions	125
Learning outcomes	125
Introduction	126
Random variables	127

The Binomial distribution	128
The Normal distribution	135
The distribution of the sample mean	143
The relationship between the Binomial and Normal distributions	150
The Poisson distribution	152
Summary	155
What's online	156
<i>Key terms and concepts</i>	156
<i>Formulae used in this chapter</i>	157
<i>Problems</i>	157
<i>Answers to exercises</i>	161
Appendix 1: E() and V() notation	163
Exercises on E() and V() operators	164
Appendix 2: The z score and the standard Normal distribution	164
Appendix 3: The mean and variance of the distribution of \bar{x}	165
5 Estimation and confidence intervals	166
Learning outcomes	166
Introduction	167
Point and interval estimation	167
Rules and criteria for finding estimates	168
Estimation with large samples	172
Precisely what is a confidence interval?	176
Estimation with small samples: the <i>t</i> distribution	184
Summary	189
What's online	189
<i>Key terms and concepts</i>	190
<i>Formulae used in this chapter</i>	191
<i>Problems</i>	191
<i>Answers to exercises</i>	194
Appendix: Derivations of sampling distributions	196
Derivation of the sampling distribution of <i>p</i>	196
Derivation of the sampling distribution of $\bar{x}_1 - \bar{x}_2$	196
6 Hypothesis testing	198
Learning outcomes	199
Introduction	199
The concepts of hypothesis testing	199
The <i>P</i> -value approach	209
Significance, effect size and power	211
Further hypothesis tests	213
Hypothesis tests with small samples	218
Are the test procedures valid?	220

Hypothesis tests and confidence intervals	221
Independent and matched samples	222
Issues with hypothesis testing	225
Summary	227
What's online	228
<i>Key terms and concepts</i>	228
<i>References</i>	228
<i>Formulae used in this chapter</i>	229
<i>Problems</i>	229
<i>Answers to exercises</i>	233
7 The χ^2 and F distributions	237
Learning outcomes	237
Introduction	238
The χ^2 distribution	238
The F distribution	252
Summary	258
What's online	259
<i>Key terms and concepts</i>	259
<i>Reference</i>	259
<i>Formulae used in this chapter</i>	260
<i>Problems</i>	260
<i>Answers to exercises</i>	264
Appendix 1: Use of χ^2 and F distribution tables	266
Appendix 2: Manual calculation of the F statistic in ANOVA	267
8 Correlation and regression	268
Learning outcomes	269
Introduction	269
What determines a household's food expenditure?	270
Correlation	273
Regression analysis	280
Inference in the regression model	287
Checking the distribution of the errors	288
Testing hypotheses about the coefficients	290
Some other issues in regression	296
Summary	300
What's online	301
<i>Key terms and concepts</i>	302
<i>Reference</i>	302
<i>Formulae used in this chapter</i>	303
<i>Problems</i>	304
<i>Answers to exercises</i>	307

9	Multiple regression	311
	Learning outcomes	312
	Introduction	312
	Principles of multiple regression	313
	Data and data transformations	314
	Estimation	314
	A graph of the regression coefficients	319
	Are the results satisfactory?	321
	Estimation using logarithms of the data	321
	Is food a necessity?	325
	Omitted variable bias	329
	Regression with time series data	334
	Some final advice on regression	338
	Summary	339
	What's online	339
	<i>Key terms and concepts</i>	340
	<i>Formulae used in this chapter</i>	341
	<i>Problems</i>	341
	<i>Reference</i>	345
	<i>Answers to exercises</i>	346
10	Workflow, data collection and analysis	349
	Learning outcomes	350
	Introduction	350
	Workflow	350
	Data collection	355
	Using secondary data sources	356
	Collecting primary data	358
	Case study: the UK Living Costs and Food Survey	374
	Summary	375
	What's online	376
	<i>Key terms and concepts</i>	376
	<i>References</i>	376
	<i>Formulae used in this chapter</i>	377
	<i>Problems</i>	377
11	Index numbers	380
	Learning outcomes	381
	Introduction	381
	A simple index number	382
	A price index with more than one commodity	383
	The Laspeyres price index	384
	A different way of calculating the Laspeyres index	389
	An alternative measure of prices: the Paasche index	390

Units of measurement	392
The story so far – a brief summary	394
Quantity and expenditure indices	395
The Laspeyres quantity index	395
The Paasche quantity index	396
Expenditure indices	396
Relationships between price, quantity and expenditure indices	397
Deflating an expenditure series	398
Real terms and volume terms	399
A calorie index	400
Chain indices	401
The Consumer Price Index	403
Other types of index	404
Inequality indices	404
The Lorenz curve	406
The Gini coefficient	408
Concentration ratios	413
Summary	414
What's online	415
<i>Key terms and concepts</i>	415
<i>Formulae used in this chapter</i>	416
<i>Problems</i>	416
<i>Answers to exercises</i>	421
Appendix 1: Deriving the expenditure share form of the Laspeyres price index	425
Appendix 2: The relationship between price, quantity and expenditure indices	425
12 Seasonal adjustment of time-series data	426
Learning outcomes	426
Introduction	427
The components of a time series	428
Forecasting	438
Further issues	439
Summary	441
What's online	441
<i>Key terms and concepts</i>	442
<i>Problems</i>	443
<i>Answers to exercises</i>	444
Important formulae used in this book	447
Appendix: Statistical Tables	452
Table A1 Random number table	452
Table A2 The standard Normal distribution	454
Table A3 Percentage points of the t distribution	455
Table A4 Critical values of the χ^2 distribution	456

Table A5(a)	Critical values of the F distribution (upper 5% points)	458
Table A5(b)	Critical values of the F distribution (upper 2.5% points)	460
Table A5(c)	Critical values of the F distribution (upper 1% points)	462
Table A5(d)	Critical values of the F distribution (upper 0.5% points)	464
Table A6	Critical values of Spearman's rank correlation coefficient	466
Table A7	Critical values for the Durbin–Watson test at 5% significance level	467
Answers and Commentary on Problems		468
