

Contents

Introduction	1
Chapter 1. Analytic Theory	3
Outline	3
1. Weak modular forms	4
2. Exponential functions	5
3. The rigid analytic structure of Ω^r	6
4. Neighbourhoods of infinity	8
5. Expansion at infinity	12
6. Modular forms	19
Chapter 2. Comparison with the Algebraic Theory	23
Introduction	23
7. Universal family of Drinfeld modules	25
8. Drinfeld moduli spaces	30
9. Satake compactification	35
10. Analytic versus algebraic modular forms	37
11. Finiteness results	42
12. Hecke operators	43
Chapter 3. Examples	49
Introduction	49
13. Eisenstein series	50
14. Hecke action on Eisenstein series	55
15. Coefficient forms	60
16. Discriminant forms	63
17. The special case $A = \mathbb{F}_q[t]$	67
Bibliography	73
Index	77
