1	Introduction	1
1.1	C^* -Algebraic Approach to the Principal Symbol Mapping on Smooth Manifolds	1
1.2	Contact Manifolds	5
1.3	Principal Symbol Mapping on Contact Manifolds	6
1.4	Connes Trace Theorem in the Setting of Contact Manifolds	14
2	Principal Symbol on the Heisenberg Group	19
2.1	Preliminaries on Heisenberg Group	19
2.1.1	Schatten Class, Ideals and Traces	19
2.1.2	Non-commutative L_p Spaces and $L_{p,\infty}$ Spaces	20
2.1.3	Group von Neumann Algebra	21
2.1.4	Schrödinger Representation of \mathbb{H}^d	22
2.1.5	Homogeneous Group von Neumann Algebra	24
2.1.6	Automorphisms of the Heisenberg Groups	26
2.1.7	Sobolev Spaces	28
2.2	Existence of the Principal Symbol Map.....	29
2.3	Connes Trace Formula for the Heisenberg Sub-Laplacian.....	34
2.4	Elliptic Estimate.....	41
2.5	Self-Adjointness of Second Order Differential Operators	49
2.6	Local Connes Trace Formula	57
3	Equivariance of the Principal Symbol Under Heisenberg Diffeomorphisms	65
3.1	The Action on the Codomain of the Principal Symbol Map	65
3.1.1	Proof of Theorem 3.1.1	66
3.1.2	Square Root Lemmas	71
3.1.3	Continuity Theorem	76
3.1.4	Proof of Theorem 3.1.2.....	81
3.2	Main Computational Theorem	81
3.2.1	Continuity Theorem	82
3.2.2	Compactness Theorems	87

3.2.3	Approximation Theorem	91
3.2.4	Proof of Theorem 3.2.2	96
3.3	Invariance of Principal Symbol Map	100
3.3.1	Conjugation of the Differential Calculus by the Heisenberg Diffeomorphisms	100
3.3.2	Equivariance Result on the Heisenberg Group	102
3.3.3	Equivariant Behaviour of the Principal Symbol Under Global Diffeomorphisms	106
3.3.4	Equivariant Behaviour of the Principal Symbol Under Local Diffeomorphisms	113
4	Principal Symbol on Contact Manifolds	117
4.1	Principal Symbol on Compact Contact Manifolds	117
4.1.1	Globalisation Theorem	117
4.1.2	Construction of the Principal Symbol Mapping	118
4.1.3	Proof of Theorem 4.1.8	120
4.2	Sub-Laplacian on a Compact Contact Manifold	126
4.2.1	Sobolev Spaces on Compact Contact Manifolds	126
4.2.2	Definition of Sub-Laplacian	126
4.2.3	Proof of Theorem 4.2.3	127
4.2.4	Ellipticity of the Sub-Laplacian	130
4.2.5	Self-Adjointness of the Sub-Laplacian	133
4.3	Liouville Trace on the Group von Neumann Algebra Bundle	134
4.4	Proof of Theorem 1.4.6	136
4.5	Spectrally Correct Sub-Riemannian Volume	147
