

Contents

Introduction	1
A quick introduction to pastures	2
Representations of matroids over pastures and the foundation of a matroid	4
Products and coproducts	6
Universal cross ratios	7
The structure theorem for foundations of matroids without large uniform minors	8
Consequences of the structure theorem	9
Content overview	10
Acknowledgments	11
Chapter 1. Background	13
1.1. Notation	13
1.2. The Tutte group	13
1.3. Embedded minors	14
Chapter 2. Pastures	17
2.1. Definition and first properties	17
2.2. Matroid representations	22
2.3. Matroid representations via hyperplane functions	23
2.4. The universal pasture	24
2.5. The Tutte group and the universal pasture	26
Chapter 3. Cross ratios	27
3.1. Cross ratios of P -matroids	27
3.2. Cross ratios for hyperplanes	29
3.3. Universal cross ratios	30
3.4. Fundamental elements	31
3.5. Compatibility with the Tutte group formulation of Dress and Wenzel	32
Chapter 4. Foundations	35
4.1. Definition and basic facts	35
4.2. Universal cross ratios as generators of the foundation	36
4.3. The foundation of the dual matroid	36
4.4. Foundations of embedded minors	37
4.5. The foundation of U_4^2	40
4.6. The tip and cotip relations	42
4.7. Relations for parallel elements	43
4.8. The foundation of the Fano matroid and its dual	44
4.9. A presentation of the foundation by hyperplanes	45

4.10.	A presentation of the foundation by bases	47
4.11.	A presentation of the foundation by embedded minors	50
Chapter 5.	The structure theorem	53
5.1.	Foundations of matroids on 5 elements	53
5.2.	Symmetry quotients	56
5.3.	The structure theorem for matroids without large uniform minors	59
Chapter 6.	Applications	63
6.1.	Forbidden minors for regular, binary and ternary matroids	64
6.2.	Uniqueness of the rescaling class over \mathbb{F}_3	65
6.3.	Criteria for representability over certain fields	65
6.4.	Oriented matroids without large minors are uniquely dyadic	66
6.5.	Positively oriented matroids without large uniform minors are near-regular	68
6.6.	Representation classes of matroids without large uniform minors	71
6.7.	Characterization of classes of matroids	76
