

Contents

Chapter 1. Introduction	1
1.1. From structuralism to FOLDS	1
1.2. Space-based definitions of higher structure	2
1.3. Univalent foundations	3
1.4. Indiscernibility	6
1.5. Limitations of our theory and comparison to other work	7
1.6. Structure of this work	8
1.7. Version history	10
Acknowledgments	10
Chapter 2. Introduction to two-level homotopy type theory and univalent foundations	13
2.1. Basic types and type constructors	14
2.2. Notions of identity	15
2.3. Stratification of types by their “homotopy level”	17
2.4. Logic in UF	19
2.5. Finiteness	20
2.6. Semantics of HoTT/UF and 2LTT	20
2.7. Fibrations and cofibrations	21
2.8. Sharpness	22
2.9. Further reading	24
Part 1. Theory of Diagram Structures	25
Chapter 3. Categories: An extended example	27
3.1. Diagram theories by example	27
3.2. Categories in HoTT	31
3.3. Structures of our signature for categories	35
3.4. Univalence at O	36
3.5. Univalence at top-level sorts	38
3.6. Univalence at A	38
3.7. Equivalence of categories	40
Chapter 4. Diagram signatures in Two-Level Type Theory	43
4.1. Exo-categories	43
4.2. Diagram signatures	44
4.3. Reedy fibrant diagrams	46
4.4. Derivatives of signatures and diagram structures	47
4.5. Axioms and theories	52

Chapter 5. Indiscernibility and univalence for diagram structures	55
Chapter 6. The univalence principle for diagram structures	61
Part 2. Examples of Diagram Structures	65
Chapter 7. Structured sets	69
Chapter 8. Structured 1-categories	73
Chapter 9. Higher categories	93
Chapter 10. Strict categorical structures	99
Chapter 11. Graphs and Petri nets	105
Chapter 12. Enhanced categories and higher categories	109
Chapter 13. Unnatural transformations and nonfunctorial operations	115
Part 3. Theory of Functorial Structures	129
Chapter 14. Functorial signatures	131
14.1. Functoriality of derivatives	131
14.2. Functorial signatures and structures	136
14.3. Axioms and theories for functorial signatures	141
Chapter 15. Levelwise equivalences of structures	143
Chapter 16. Indiscernibility and univalence	147
Chapter 17. Equivalence of structures and the univalence principle	151
Chapter 18. Examples of functorial structures	157
Chapter 19. Conclusion	163
Bibliography	165
Index of Symbols	171
Index	173
