

Contents

Preface	vii
1 The Total Design Activity	1
1.1 Introduction	1
1.2 Engineering/total design rigour – they're different	3
1.3 Definition of total design	5
1.4 Some examples of total design	10
2 Design Core: Market/User Needs and Demands	29
2.1 Introduction	29
2.2 Types of information required at the market investigation/user need stage	32
2.3 Information analysis	35
3 Design Core: The Product Design Specification	44
3.1 Introduction	44
3.2 The contents of a product design specification	48
3.3 The PDS document	64
3.4 The partial PDS	65
4 Design Core: Conceptual Design	67
4.1 Introduction	67
4.2 Design – the conceptual phase – how to deal with it	68
4.3 Generation of solutions	69
4.4 Environment for getting ideas	70
4.5 Concepts – form and presentation	71
4.6 Criteria for evaluation	72
4.7 Evaluation of solutions	72
4.8 Concept evaluation/generation	74
4.9 Conceptual phase – outcome	99

5	Design Core: Detail Design (Technical Design)	101
	5.1 Introduction	101
	5.2 Detail design	102
	5.3 The component design specification	104
	5.4 General points to be noted in detail design	105
	5.5 Aids to detail design	107
6	Design Core: Manufacture	136
	6.1 Introduction	136
	6.2 Design for manufacture	137
	6.3 'Design for' imbalances	143
	6.4 Design of the manufacturing process	144
7	Design Core: Selling (Marketing)	149
	7.1 Introduction	149
	7.2 Products – large one-off manufacture	150
	7.3 Products – small/medium batch manufacture	152
	7.4 Products – mass produced	154
	7.5 The common links	154
8	Variations to the Total Design Activity Model	158
	8.1 Introduction	158
	8.2 Static/dynamic product concepts	158
	8.3 Simultaneous engineering variants – relative to product status	171
9	Design Management	174
	9.1 Introduction	174
	9.2 Embodiment design and static/dynamic concepts	174
	9.3 Static/dynamic concepts – frame freeze	177
	9.4 Business design activity model	177
	9.5 Application of the business design activity model in practice	179
	9.6 The design review	181
	9.7 Design process independent of discipline or product	184
	9.8 Postscript	187
10	Electronic Aids to Total Design	188
	10.1 Introduction	188
	10.2 Communication design	189
	10.3 Origins of CAD	190
	10.4 The interface between man and machine	196
	10.5 Facsimile aid to design (FAD)	197
	10.6 Electronic white boards	197
	10.7 The ideal set-up	198

11	Further Methods to Assist the Design Core	201
	11.1 Introduction	201
	11.2 Quality function deployment	201
	11.3 Functional cost analysis	207
	11.4 Failure mode and effect analysis	208
	11.5 Functional trees	210
	11.6 Taguchi methods	214
12	Total Design: A Summary	219
	12.1 Introduction	219
	12.2 Principles of total design	221
13	Exercises to Illustrate the Design Core	223
	13.1 Introduction	223
	13.2 Marker/user need – information retrieval	223
	13.3 PDS	224
	13.4 Conceptual design	231
	13.5 Total design – putting it all together	236
	Appendices	245
A	Surgeon Questionnaire	246
B	Examples of Analogy	251
C	Domestic Door Security Device – Total Design Task	259
	Bibliography	268
	Index	273
