Preface IX

Acknowledgements XXIV

Transliteration and Abbreviations XXVI

## Chapter I 1

- A. The Current State of Research 1
- B. The Origins of Mathematical Geography 17
  - 1. *Greece before Marinus* 17
  - 2. *Marinus* 19
  - 3. *Ptolemy* 24
    - a. Did Ptolemy Add Maps to His *Geography*? 30
    - b. Ptolemy's *Geography* in Late Antiquity 35
    - c. Did Agathodaimon (ca. 5th Century CE) Design the "Ptolemaic" Maps? 38
    - d. Did Maximus Planudes (around 1300 CE) Conceive the "Ptolemaic" Maps under the Influence of the Atlas Made for al-Ma'mūn? 39
- C. Mathematical Geography in the Transitional Period between the Greeks and the Arabs 45
  - 1. *Among the Syriacs and the Armenians* 45
  - 2. *Among the Persians* 49
  - 3. *Among the Indians* 52
- D. The Beginnings of Mathematical Geography in the Islamic World 57
  - 1. *Until the Emergence of Ma'mūn's Geography* 57
  - 2. *The Creation of Ma'mūn's Geography* 63
  - 3. *Earth Measurement under al-Ma'mūn* 73
  - 4. *Remnants of Ma'mūn's Geography as Known to Us Today* 78
  - 5. *Stereographic Projection as the Basis of the Ma'mūnian World Map* 89
  - 6. *The Determination of Longitude and Latitude by Ma'mūn's Geographers* 92
  - 7. *The Entry of City Coordinates and Centre Point Coordinates of Countries and Islands onto the Maps* 95
  - 8. *Instructions for Drawing Mountains on the Maps* 97
  - 9. *Cartographic Scales in Ma'mūn's Geography* 98
  - 10. *Cartographic Instructions by Ma'mūn's Geographers* 99
  - 11. *The Ocean Theory of Ma'mūn's Geographers* 101
  - 12. *Islamic Cartography Independent of Ma'mūn's Geography* 104

13. *The Dissemination of Ma'mūn's World Map in North Africa and Spain* 106
14. *The Aftermath of Ma'mūn's Geography* 110
- E. *Post-Ma'mūnian Developments in Geographical Localization in the 3rd/9th and 4th/10th Centuries* 113
- F. *Methods of Geographical Localisation, 5th/11th to the 7th/13th Century* 120
  1. *The 5th/11th Century as the Beginning of a New Era in Geographical Localisation* 120
  2. *Al-Bīrūnī's Development of Mathematical Geography into an Independent Discipline* 124
  3. *Progress Made in Islamic Spain in Determining Geographical Locations* 130
  4. *Further Developments after Bīrūnī's Reform* 135
  5. *A Unique Method for Determining Longitude in Abu l-Ḥasan al-Marrākushī* 136
- G. *The Further Development of Geographical Coordinate Tables in the Centre and East of the Islamic World* 140
  1. *Persia and the Ottoman Empire* 140
  2. *Correction and Increase of Geographical Coordinates for Central Asia in the 9th/15th Century* 157
  3. *The Mathematical Mapping of the Indian Subcontinent from the 15th to the 17th Century Following al-Bīrūnī's Contribution* 159

## Chapter II 168

- A. *The Legacy of Arabic Geography in the West* 168
  1. *Its Initial Reception in the 10th Century CE* 168
  2. *Impact on the Marseille Tables* 172
  3. *Impact on the Tables of the Theorica Planetarum (12th Century CE)* 173
  4. *Impact on the Alfonsine Tables* 174
  5. *Impact on Roger Bacon* 176
  6. *Impact on Albertus Magnus* 181
  7. *Impact on Brunetto Latini* 183
  8. *Impact on Dante Alighieri* 183
  9. *The Byzantines as Transmitters of Arabic Tables and Maps to Europe* 185
- B. *Coordinate Tables Created in Europe in the 14th and 15th Centuries, Following Arabic Models* 186
  1. *The Tables in Ms. Vienna 2452* 188
  2. *The Anonymous Table from Tortosa (Translated in 1307 CE)* 189

3. *The Portuguese Version of a Table of Arabic Origin* 189
  4. *The Three Tables of Diego de Torres and Zacuto* 190
  5. *The Table by Conrad von Dyffenbach* 194
  6. *Ms. Vienna 2332 (15th Century CE)* 196
  7. *The Tables of Theodoricus Ruffi (Mid-15th Century)* 198
  8. *Ms. Vatican, Regin. Lat. 1346, 23v* 201
  9. *Mss. Vienna, National Library, Vind. 2323, f. 78r and 2367, f. 192r* 202
  10. *Ms. Vienna, National Library, Vind. 5311, 132r* 203
  11. *The Pseudo-Alfonsine Tables* 204
  12. *The Munich Collection of Tables and Maps* 206
  13. *A Further Group of (approx. 80) Tables, Probably Dating from the 14th and 15th Centuries* 210
- C. *Ptolemy's Geography in Europe* 222
1. *The Belated Emergence of Ptolemy's Geography in Europe* 222
  2. *Pierre d'Ailly* 225
  3. *The Table of Cardinal Guillaume Fillastre* 225
  4. *Regiomontanus* 226
  5. *Magister Reinhardus* 230
  6. *The Italian Coordinate Table* 231
  7. *The First European Attempts to Determine the Longitudinal Span of a Degree of Meridian under Arabic Influence* 232
- Chapter III** 235
- A. *Arabic Influence on the Emergence of a New Map Type in Europe* 235
1. *The Origin of the Portolan Charts* 235
  2. *Arabic Maps as Possible Models* 247
  3. *The Significance of the Schools of Marāgha and Tabriz for the Novel Portolan Charts and World Maps* 255
  4. *The Role of Marco Polo as a Transmitter of Maps from the Islamic world* 260
  5. *World Maps Created in China Based on Arabic Models* 264
  6. *The Oldest Arabic Traces on European World Maps* 269
  7. *The Oldest Arabic Traces on European Portolan Charts* 274
- B. *The Cartographic Representation of Asia* 278
1. *Beginnings of its Cartographic Depiction* 278
  2. *Russia, Siberia and Central Asia (Herberstein – Gerasimov – Agnese – Wied – Jenkinson – Bolšoi čertjež – Massa – Godunov – Witsen – Ides – Winius – Remesow – Pétiſ de la Croix – Strahlenberg – Abu l-Ghāzī – Delisle)* 292

3. *Persia and Eastern Anatolia* (Bīrūnī – K. al-Aṭwāl wa-l-ʿurūd – Naṣīraddīn al-Ṭūsī – Mustawfī – Ṣādiq-i Iṣfahānī – Gastaldi – Olearius – Sanson – Reland – Homann – Ottoman Geographers – Delisle) 328
4. *The Caucasus* (Delisle) 353
5. *The Black Sea* (Maʿmūn's Geographers – al-Idrīsī – Seljuqs – Tables from the 7th/13th Century – al-Ṭūqātī – Brunetto Latini – Petrus Vesconte – Portolan Charts and World Maps up to the 16th Century – Influence of Maps Attributed to Ptolemy – Overcoming This Influence – Delisle, French Priests, and the Paris Academy – Arabic-Islamic Predecessors – Vaugondy – Bowen – Ottoman Cartographers – Chardin – Ottoman Influence in Russia and Europe – Bruce/Mengden – Ides – Strahlenberg – Rugell – Ott – Russian Maps after 1774) 360
6. *The Caspian Sea* 389
7. *Lake Urmia* 423
8. *The Aral Sea* 427
9. *Lake Baikal* 435
10. *Lake Balkhash* 437
11. *Issyk-kul* 440
12. *Amu-Darya and Syr-Darya* 443
13. *Summary* 448
- C. *The Cartographic Representation of the Indian Ocean* 453
  1. *The Development of Africa's Peninsula Shape until the Beginning of the 16th Century under the Influence of Arabic World Maps* 456
  2. *The Cartographic Representation of India* 468
    - a. *The Emergence of the Map of the Indian Subcontinent in the Form of a Peninsula on European Maps under the Influence of Arabic Models* 468
    - b. *The Globe on a Painting with Jahāngīr and Shāh ʿAbbās* 475
    - c. *The Map of Ṣādiq-i Iṣfahānī* 476
    - d. *The Map of Gujarat* 477
    - e. *The Map of Bengal* 482
    - f. *The Map of Kashmir* 486
    - g. *The Maps of Colonel Gentil* 487
    - h. *Northern India on a Map from the Mughal Period* 490
    - i. *A Persian Map of the Punjab* 491
    - j. *The Contribution of d'Anville* 492
    - k. *The Contribution of James Rennell* 500
    - l. *Closing Remarks* 520
