

Contents

Chapter 1. Introduction	1
1.1. The inequality	1
1.2. An integral representation	1
1.3. Parseval-like formulas	3
1.4. Multilinear Parseval-like formulas	4
1.5. Projective boundedness and projective continuity	7
1.6. A personal note and acknowledgements	8
Chapter 2. Integral representations: the case of discrete domains	9
2.1. First question	9
2.2. Second question	11
2.3. Third question and Grothendieck's <i>théorème fondamental</i>	14
Chapter 3. Integral representations: the case of topological domains	19
3.1. L^2 -continuous families	19
3.2. A "continuous" version of <i>le théorème fondamental</i>	22
Chapter 4. Tools	25
4.1. The framework	25
4.2. Rademacher and Walsh characters	25
4.3. Walsh series	26
4.4. Riesz products	27
4.5. Continuity	29
Chapter 5. Proof of Theorem 3.5	31
5.1. The construction of Φ	31
5.2. Φ is odd	32
5.3. An integral representation of the dot product	33
5.4. Φ is weakly continuous	33
5.5. Φ is $(l^2 \rightarrow L^2)$ -continuous	34
Chapter 6. Variations on a theme	35
6.1. The map Φ_2	35
6.2. Sharper bounds	38
Chapter 7. More about Φ	39
7.1. Spectrum	39
7.2. $(l^2 \rightarrow L^p)$ -continuity	39
7.3. $(l^2 \rightarrow L^\infty)$ -continuity?	40
7.4. Linearization	41

Chapter 8. Integrability	43
8.1. Integrability of Φ	43
8.2. Integrability of $\Phi \otimes \Phi$	44
8.3. Integrability of the inner product	48
Chapter 9. A Parseval-like formula for $\langle \mathbf{x}, \mathbf{y} \rangle$, $\mathbf{x} \in l^p$, $\mathbf{y} \in l^q$	51
Chapter 10. Grothendieck-like theorems in dimensions > 2 ?	57
10.1. A multidimensional version of Question 2.3	57
10.2. A multidimensional version of Question 2.6	58
Chapter 11. Fractional Cartesian products and multilinear functionals on a Hilbert space	61
11.1. Projective boundedness and projective continuity	61
11.2. Fractional Cartesian products	64
11.3. A characterization of projectively continuous functionals	68
Chapter 12. Proof of Theorem 11.11	73
12.1. A multilinear Parseval-like formula	73
12.2. The left-side inequality in (11.81)	82
12.3. The right-side inequality in (11.81)	84
12.4. Multilinear extensions of the Grothendieck inequality	85
Chapter 13. Some loose ends	87
13.1. $\tilde{\mathcal{V}}_2(X \times Y)$ vs. $\tilde{V}_2(X \times Y)$, $\mathcal{G}_2(X \times Y)$ vs. $G_2(X \times Y)$	87
13.2. $\mathcal{G}_2(X \times Y) = \tilde{\mathcal{V}}_2(X \times Y)$ vs. $G_2(X \times Y) = \tilde{V}_2(X \times Y)$	87
13.3. Projective boundedness vs. projective continuity	87
13.4. A characterization of projective boundedness	88
Bibliography	89
