

CONTENTS

1	Introduction	1
2	Phylogeny of the Facial Nerve	5
	☐ Cranial Development in the First Land Animals	5
	☐ Development of the Brain Case	6
	☐ Jaw Suspension	10
	☐ The Dermatocranium	10
	☐ Anatomic Changes in the Early Tetrapods	12
	☐ Ventilation and Locomotion	15
	☐ Profound Changes in Morphology and Physiology	16
	☐ The Modern Jaw	19
	☐ Facial Expression	22
3	Embryology of the Facial Nerve	29
	☐ Adult Anatomy	49
	☐ Embryology of the Intracranial Portion of the Facial Nerve	56
	☐ Fertilization through the Fourth Week	62
	☐ Fifth through Sixth Week	66
	☐ Seventh through Ninth Week	75
	☐ Tenth through Fifteenth Week	83
	☐ Sixteenth Week through Birth	93
4	Clinical Application	123
	☐ Case 1	124
	☐ Case 2	125
	☐ Case 3	128
	☐ Case 4	132

- ❑ Case 5 134
- ❑ Case 6 136
- ❑ Case 7 138
- ❑ Case 8 142
- ❑ Case 9 145
- ❑ Case 10 149
- ❑ Case 11 152

5 Isolated Anomalies of the Facial Nerve 155

- ❑ Dehiscence of the Facial Nerve 158
- ❑ Variations in Position of the Facial Nerve 159
- ❑ Discussion 164

6 Structural, Congenital, and Hereditary Abnormalities 169

- ❑ Syndromes Associated with Facial Nerve Abnormalities 170
