|--|------------|
| Introduction | 9 |
| 1. Expansions of moments and distributions | 19 |
| 1.1. ε -neighbouring point sets | 19 |
| 1.2. Weakly correlated functions | 21 |
| 1.3. Expansions of moments of random linear functionals | 25 |
| 1.4. Expansions of distributions of linear functionals | 36 |
| 1.5. A special case of weakly correlated processes | 59 |
| 1.6. Determination of statistical characteristics | 65 |
| 1.6.1. Determination of 2A_1 | 65 |
| 1.6.2. Determination of 2A_2 in the one-dimensional case | 75 |
| 1.6.3. Examples | 88 |
| 1.6.4. Determination of 2A_2 in the multi-dimensional case | 94 |
| 1.6.5. Examples | 104 |
| 1.6.6. Determination of ${}^pA_{p-1}$ for $p = 3, 4$ | 111 |
| 1.7. Expansions of moments of random functional-functions | 120 |
| 1.8. Expansions of distributions of random functional-functions | 140 |
| 2. Simulation of weakly correlated processes | 161 |
| 2.1. Linear functionals | 161 |
| 2.2. Simulation results of linear functionals | 191 |
| 2.3. Functional-functions | 202 |
| 2.4. Simulation results of functional-functions | 214 |
| 3. Random vibrations | 220 |
| 3.1. Random vibrations of continua | 220 |
| 3.1.1. Deterministic solutions | 220 |
| 3.1.2. Weakly correlated excitation | 224 |
| 3.1.3. Comparing results | 234 |
| 3.1.4. Partially weakly correlated excitations as to the spatial variables | 245 |
| 3.1.5. Applications | 251 |
| 3.1.6. Partially weakly correlated excitations as to the time variable | 259 |
| 3.1.7. Comparing results | 272 |
| 3.2. Random vibrations of discrete mechanical systems | 283 |
| 3.2.1. Linear vibration systems with non-weakly correlated input | 283 |
| 3.2.2. Linear vibration systems with weakly correlated input | 290 |
| 3.2.2.1. Approximation of random road surfaces | 290 |
| 3.2.2.2. Direct weakly correlated input | 293 |

| | | |
|-------------------------|---|------------|
| 3.2.2.3. | Indirect weakly correlated input | 311 |
| 3.2.3. | Non-linear vibration systems with weakly correlated input | 320 |
| 3.2.3.1. | Expansions of first and second moments of solutions | 320 |
| 3.2.3.2. | Examples | 330 |
| 4. | Random temperature propagation | 341 |
| 4.1. | Deterministic solutions | 341 |
| 4.2. | Random temperatures of a half-plane | 350 |
| 4.3. | Random temperatures of a bounded domain | 364 |
| 4.3.1. | Weakly correlated temperature gradient. | 364 |
| 4.3.2. | Partially weakly correlated temperature gradient. | 383 |
| 4.3.3. | Sliding temperature gradient. | 401 |
| 5. | Random boundary value problems | 409 |
| 5.1. | Ordinary differential operators | 409 |
| 5.2. | Partial differential operators | 436 |
| Bibliography | | 462 |
| Author Index | | 472 |
| Subject Index | | 474 |
