

# Table of Contents

<b>Preface to the Second Edition</b>	v
<b>Acknowledgements: The Development of the Program</b>	vii
<b>Introduction</b>	ix
<b>Part I A NON-TECHNICAL DESCRIPTION OF MULTIPLE CLASSIFICATION ANALYSIS</b>	
<b>Chapter 1 Uses of Multiple Classification Analysis</b>	1
1.0 Summary	1
1.1 Some Goals of Multivariate Analysis	1
1.2 A Multivariate Analysis Problem	2
1.3 Special Advantages of the MCA Technique	3
1.4 Data Appropriate for an MCA	6
1.5 Printout from the Program	6
<b>Chapter 2 Major Features of the Program</b>	9
2.0 Summary	9
2.1 Input Data	9
2.1a <i>The dependent variable.</i>	9
2.1b <i>Predictor variables.</i>	10
2.1c <i>Weights.</i>	11
2.2 Analysis of Subgroups	11
2.3 Multiple Analyses	12
2.3a <i>Analysis packets.</i>	12
2.3b <i>Multiple predictor lists within a packet.</i>	12
2.3c <i>Strategy for models with logically prior sets of variables.</i>	13
2.4 Iteration and Coverage: User Options	13
2.5 One-Way Analysis of Variance	15
2.6 Residuals	15
<b>Chapter 3 Limitations of the Program</b>	17
3.0 Summary	17
3.1 Additive Models and Their Limitations	18
3.2 What to Do About Interaction	20
3.2a <i>Interaction known to be absent.</i>	20
3.2b <i>Interaction known to be present.</i>	20
3.2c <i>Presence of interaction in doubt.</i>	21
3.3 The Iterative Procedure and Its Limitations	22
3.3a <i>The iterative process.</i>	23
3.3b <i>Situations with cause problems.</i>	25
3.3c <i>Closely overlapped categories.</i>	25
3.3d <i>What to do when iterations fail to converge.</i>	26
3.4 Number of Cases	27
3.5 The Core Storage Limitation	28

<b>Part II A STATISTICAL DESCRIPTION OF THE PROGRAM</b>	
<b>Chapter 4 Formulas</b>	31
4.0 Summary	31
4.1 Formulas for Statistics Printed by the Program	31
4.2 Formulas for Two F Statistics Not Calculated by the Program	33
4.3 Procedures for Computing Measures of a Predictor's Importance	34
4.4 The Statistical Model	36
4.5 Formulas for the Iterative Procedure	37
<b>Chapter 5 Relations between the MCA Technique and Analysis         of Variance</b>	39
5.0 Summary	39
5.1 A Comparison of MCA with Complex Least-Squares Analysis of Variance	39
<b>Chapter 6 Relations between the MCA Program and Multiple         Regression</b>	45
6.0 Summary	45
6.1 Multiple Regression Using Dummy Variables	45
6.2 Similarities in Coefficients	46
6.3 The Partial Beta Coefficients: Interpretation of Beta	47
6.4 Another View of MCA Betas	48
6.5 Some Other Multiple Regression Techniques	50
6.6 Sampling Errors	50
6.7 The Advantages of MCA Printout	52
<b>APPENDICES</b>	
<b>Appendix A Set-Up Instructions</b>	57
<b>Appendix B Reading the Printout and Presenting Results</b>	65
<b>Appendix C MCA Macro Flow Chart</b>	73
<b>Appendix D Sample Output</b>	79
<b>Appendix E Obtaining the Program and Adapting It to Other         Systems</b>	99
<b>Bibliography</b>	101
<b>Index</b>	103

## LIST OF FIGURES

<b>Figure 1 Correlated Predictors</b>	4
<b>Figure 2 Additive Effects</b>	19
<b>Figure 3 Interaction Effect</b>	19
<b>Figure 4 Additive Effects and Interaction Effect</b>	20
<b>Figure 5 Progress of a Coefficient toward its Correct Value</b>	24
<b>Figure 6 Perfectly Overlapped Categories</b>	25
<b>Figure 7 Analysis of Variance Notation</b>	40
<b>Figure 8 Division of Total Sum of Squares</b>	43
