

Contents

Preface	iii
Introduction	ix
1 Structural Reliability	1
1 Structure Function, Paths and Cuts: A Deterministic Approach	2
2 Reliability of a System of Independent Nonrenewable Components	9
3 Bounds on System Reliability	16
4 Approximation to System Reliability When Components Are Highly Reliable	24
5 Problems	29
6 Comments and Notes	35
Selected References	38
2 Lifetime Distributions in Reliability	41
1 The Exponential Distribution: The Memoryless Property	43
2 Normal, Weibull, and Related Distributions	50
3 Properties of Components and Systems Based on Various Types of Aging	59

4	Problems	68
5	Comments and Notes	72
	Selected References	77
3	Reliability of a System with Renewable Components: Fast Repair	81
1	Exponentially Distributed Lifetimes and Repair Times: Fast Repair	83
2	Distribution of System Lifetime: Fast Repair, Arbitrary Distributed Repair Time	93
3	Deviation from Exponentiality in Birth and Death Process: Ergodic Exit and Sojourn Times. IMRL Family	104
4	Problems	107
5	Comments and Notes	109
	References	111
4	System Reliability Improvement by Means of Optimal Preventive Maintenance and by Optimal Use of Standby Components	115
1	Optimal Inspection and Maintenance of a Single-Unit Binary System: Maximization of the Expected Operational Time During a Finite Time Period	117
2	Optimal Preventive Maintenance of a System of Independent Binary Components: Availability Maximization on an Infinite Time Interval	124
3	Reliability Optimization of Redundant Systems	131
4	Problems	149
	Selected References	152
5	Lifetime Data Analysis in Reliability	155
1	Nonparametric Estimation of the Reliability Function: Graphical Procedures	158
2	Models of Censoring. Statistical Inference Based on the Method of Maximum Likelihood: General Outline	179
3	Lifetime Models with Explanatory Variables	194
4	Exponential and Weibull Distributions Without Explanatory Variables	213
5	Proportional Hazard Model	240
6	Confidence Intervals for System Availability and Reliability	247
7	Problems	273
	Appendix 1 $O(\cdot)$ and $o(\cdot)$ Symbols	277
	References	278
	Appendix 2 The Laplace Transform	279
	References	282

Contents**vii**

Appendix 3 Birth-and-Death Processes	283
References	288
Appendix 4 Renewal Theory	291
References	297
Answers and Solutions to Problems	299
Chapter 1	299
Chapter 2	300
Chapter 3	303
Chapter 4	305
Chapter 5	307
Notation and Abbreviations	313
Index	319
