Preface and Acknowledgments	v	The neuropsychology of visual imagery	79
Preface to the Revised Edition	vii	What use the sketchpad?	82
1. Why Do We Need Memory?	1	Overview	84
Understanding learning and memory	1	6. Attention and the Control of Memory	85
What is memory?	3	The study of attention	85
Laws, principles, theories and models	6	The control of action	91
2. Perceiving and Remembering	9	The SAS as a central executive	95
Sensory memory	9	The central executive and fluent reading	96
Visual memory	10	Overview	101
Auditory memory	18	7. When Practice Makes Perfect	103
Overview	26	What is learning?	103
3. How Many Kinds of Memory? The Evidence for STM	29	Learning as the acquisition of new information	104
The capacity of short-term memory	29	Learning and practice	108
Short-term forgetting	31	Massed and distributed practice	109
One or two memory stores?	37	Levels of processing	115
The modal model	44	Subsequent developments	118
The rise of levels of processing	47	Levels of processing: Current interpretations	120
Overview	47	Overview	123
4. The Role of Memory in Cognition: Working Memory	49	8. Organizing and Learning	125
Testing the working memory hypothesis	50	The role of organization	125
A working memory model	51	The waitress's dilemma	126
The phonological loop	52	Experimental studies of organization	129
What use the phonological loop?	63	Mnemonics	133
Overview	69	Programs to improve memory	137
5. Visual Imagery and the Visuo-spatial Sketchpad	71	Overview	142
Visual memory	71	9. Acquiring Habits	145
Imagery and working memory	74	Conditioning in animals	145
		Behavior modification	152

- Conditioning and advertising 158
 Changing habits 159
 Token economy systems 162
 Reflections on behavior modification 165
 Overview 166
- 10. When Memory Fails 169**
 The forgetting curve 169
 Why do we forget? 176
 The role of interference 179
 Forgetting to do things 186
 Overview 189
- 11. Retrieval 191**
 The concept of retrieval 191
 Forgetting as retrieval failure 193
 Recall and recognition 197
 Models of retrieval 199
 Tulving's synergistic ephory theory 203
 Recall: One process or two? 206
 Enhancing eyewitness memory 209
 Overview 210
- 12. Recollection and Autobiographical Memory 211**
 Probing autobiographical memory 211
 The feeling of knowing 214
 Strategies of recollection 216
 Forgetting autobiographical events 220
 Retrograde amnesia (RA) 222
 Overview 227
- 13. Knowledge 229**
 Semantics 229
 Models of semantic memory 233
 Schemas and frames 240
 The neuropsychology of semantic memory 250
 Overview 254
- 14. Where Next? Connectionism Rides Again! 257**
 The roots of connectionism 257
 Perceptrons and parallel processing 259
 Distributed representation 266
 PDP and cognitive psychology 268
 Overview 272
- 15. Memory, Emotion and Cognition 273**
 Repression 273
 Mood and memory 281
 Anxiety, memory and perception 285
 Overview 291
- 16. Understanding Amnesia 293**
 Amnesia 293
 Closed head injury and memory 296
 The amnesic syndrome 298
 Explaining the amnesic syndrome 301
 Alzheimer's disease 307
 Overview 309
- 17. Treating Memory Problems 311**
 Assessing memory deficits 311
 Treatment and its evaluation 315
 Treatment designs 316
 Overview 324
- 18. Consciousness 325**
 Introspection: Spying on the ghost within the machine 325
 The philosophical problem of consciousness 326
 Why we need a theory of consciousness 328
 A speculative approach to consciousness 331
- 19. Implicit Learning 335**
 Learning an artificial grammar 336
 Redundant sequence learning 338
 Controlling complex systems 339
 What is learned: Rules or chunks? 340
 Is the learning unconscious? 340
 Is unconscious learning possible? 343
 Acquiring an using rules 345
- 20. Recollective and Implicit Memory 351**
 The recollective memory system 352
 The evidence for implicit learning 352
 Analysis and terminology 357
 Theoretical interpretations 358
 Purifying measures of memory 360
- References 373**
