

Contents

1.	<u>INTRODUCTION</u>	
1.1	Basic Ideas	1
1.2	Methods	5
1.3	Background Reading	11
2.	<u>KERNEL ESTIMATORS</u>	
2.1	Informal Concepts of Kernel Estimation.	15
2.2	Single Continuous Variables	21
2.3	Multiple Continuous Variables	34
3.	<u>CHOICE OF SMOOTHING PARAMETERS AND KERNEL FOR CONTINUOUS VARIABLES</u>	
3.1	Introduction	45
3.2	The MSE and MISE Measures	46
3.3	Other Measures	66
3.4	Cross Validation	76
3.5	To Choose a Method	82
3.6	Location Dependent Smoothing Parameters	116
4.	<u>CATEGORICAL VARIABLES</u>	
4.1	Introduction	123
4.2	Kernels for Categorical Variables	128
4.3	Choosing Smoothing Parameters	138
	4.3.1 Maximum likelihood	139
	4.3.2 Cross validatory methods	140
	4.3.3 Hall's method	143
	4.3.4 Marginal methods	145
	4.3.5 Other pseudo-Bayes methods	152
4.4	Choosing a Method of Choosing a Smoothing Parameter	154
5.	<u>LOSS ESTIMATION AND VARIABLE SELECTION</u>	
5.1	Introduction	165
5.2	Error Rate Estimation	169
5.3	On Choosing Variables	185
5.4	Separability Measures	196
5.5	Selection Algorithms	201
