

Contents

PART ONE DESCRIPTIVE STATISTICS

- 1 Scope and content of statistics, 3**
- 2 Presentation of data, 13**
 - Lesson 1 Frequency distributions, 13
 - 2 Graphic methods, 18
- 3 Summary statistics, 28**
 - Lesson 1 Symbols and measures of central tendency, 28
 - 2 Measures of variability, 35
 - 3 Shape of a distribution and the normal curve, 41
 - 4 Score conversions, 48

PART TWO RATIONALE OF INFERENCE STATISTICS

- 4 Probability, 57**
 - Lesson 1 Definitions and combined events, 57
 - 2 The binomial distribution, the Poisson distribution, and Bayes' theorem, 64
- 5 Sampling and sampling distributions, 74**
 - Lesson 1 Random samples, 74
 - 2 Sampling distribution of a proportion, 80
 - 3 Sampling distribution of a mean, 88
- 6 Confidence intervals, 96**
 - Lesson 1 Confidence intervals for proportions, 96
 - 2 Confidence intervals for means, 105

7 Hypothesis testing, 111

- Lesson 1 Basic concepts and tests of proportions, 111
- 2 Tests of the mean, 121
- 3 Type II errors and power of a test, 128

PART THREE APPLICATIONS OF INFERENTIAL STATISTICS

8 Two-sample experiments, 139

- Lesson 1 Sampling distribution of a difference between statistics, 139
- 2 Two-sample inferences involving proportions and means, 147

9 Comparisons of population proportions using chi-square, 156

- Lesson 1 Tests of goodness of fit, 156
- 2 More applications of the goodness of fit test, 166
- 3 Tests of association, 176

10 Significance tests for variances using chi-square and F distributions, 190

11 Comparison of several means, 202

- Lesson 1 One-way analysis of variance, 202
- 2 Individual comparisons, assumptions, and models, 213
- 3 Two-way ANOVA (basic concepts), 226
- 4 Multifactor ANOVA (complications), 241

12 Correlation and regression, 261

- Lesson 1 The correlation coefficient r , 261
- 2 Measures of relationship for discrete variables, 275
- 3 One-predictor variable linear regression analysis, 288
- 4 Multiple regression analysis, 308

13 Analysis of covariance, 322

14 Nonparametric statistics, 339

- Lesson 1 One- and two-sample tests, 339
- 2 Multiple-sample tests, 355

15 Study design and interpretation of results, 366

Appendixes**A Public health data and analyses, 375**

- Lesson 1 Sources of public health data, 375
 - 2 Rates and their direct adjustment, 380
 - 3 Indirect adjustment of rates, 386
 - 4 Ordinary life tables, 390
 - 5 Follow-up life tables, 398

B Answers to exercises, 404**C Comprehensive example of hypothesis testing, 421****D Important formulas appearing in the text, 427****E Useful tables, 435**
