	<i>Page No.</i>
<i>Preface</i>	vii
<i>List of Symbols</i>	ix
<i>Chapter 1. Simple Propositional Logic</i>	1
1.1–2 Logical connectives	1
1.3 Conditionals	7
1.4 Tautology. Contradiction	8
1.5 Logical relations	10
1.6 Relatives of a conditional	12
1.7 Some important methods of proof	13
<i>Chapter 2. Elementary Set Theory and Boolean Algebras</i>	21
2.1 Notation and idea of a set	21
2.2 Operations on sets	23
2.3 Basic set laws	26
2.4 Comparing a Boolean algebra with ordinary elementary algebra	34
2.5 General form of a Boolean algebra. Isomorphism. Switching circuits	36
2.6 Number of elements in sets and the unions and intersections of sets. Transfinite cardinals	55
<i>Chapter 3. Mathematical Induction. Binomial Theorem. Elementary Probability Theory</i>	67
3.1 Well-ordering principle	67
3.2 Principle of mathematical induction	68
3.3 Permutations and combinations	70
3.4 Binomial theorem	78
3.5–6 Introduction and definitions regarding set measure and probability measure	81
3.7 Conditional probability	87
3.8 Bayes's theorem (<i>a-posteriori</i> probability)	91

<i>Chapter 4. Relations and Functions</i>	103
4.1 Cartesian product	103
4.2 Relations	106
4.3 Equivalence classes. Partitions	113
4.4 Order relations	115
4.5 Functions	116
<i>Chapter 5. Matrices</i>	124
5.1 Definition of a matrix	124
5.2 Addition of matrices	127
5.3 Scalar multiplication of matrices	129
5.4 Linear transformations	130
5.5 Multiplication of matrices	135
5.6 Transpose of a matrix. Symmetric and skew-symmetric matrices	146
5.7 Inverse of a square matrix of order 2	151
5.8 Determinants of order 3	154
5.9 Inverse of a square matrix of order 3	161
<i>Chapter 6. Algebraic Structure</i>	170
6.1 General introduction	170
6.2–7 Introduction to groups	171
6.8 Formal definition of a group	177
6.9 Basic group theorems	178
6.10 Further implications of the group concept	181
6.11 Subgroups	185
6.12 Cyclic groups	187
6.13 Definition of a ring	194
6.14 Properties of rings. Subrings	196
6.15 Definition and properties of a field	198
<i>Answers</i>	201
<i>Bibliography</i>	210
<i>Index</i>	211
