

Contents

1	Events and Probability	1
1.1	Introduction to Probability	1
1.2	Combinatorial Probability	3
1.3	The Algebra of Events	9
1.4	Probability	17
1.5	Conditional Probability	20
2	Random Variables	27
2.1	Random Variables as Functions	27
2.2	Densities of Random Variables	31
2.3	Some Particular Distributions	41
3	Expectation	47
3.1	Properties of Expectation	47
3.2	Moments of Random Variables	51
3.3	Covariance and Correlation	56
4	Conditional Expectation	65
4.1	Definition and Properties	65
4.2	Conditional Variance	72
5	Limit Theorems	83
5.1	The Law of Large Numbers	83
5.2	The Central Limit Theorem	86
6	Simple Random Sampling	91
6.1	The Model	91

6.2	Unbiased Estimates for Y and \bar{Y}	99
6.3	Estimation of Sampling Errors	103
6.4	Estimation of Proportions	107
6.5	Sensitive Questions	112
7	Unequal Probability Sampling	117
7.1	How to Sample	117
7.2	<i>WR</i> Probability Proportional to Size Sampling	122
7.3	<i>WOR</i> Probability Proportional to Size Sampling	128
8	Linear Relationships	135
8.1	Linear Regression Model	135
8.2	Ratio Estimation	138
8.3	Unbiased Ratio Estimation	144
8.4	Difference Estimation	148
8.5	Which Estimate? An Advanced Topic	150
9	Stratified Sampling	155
9.1	The Model and Basic Estimates	155
9.2	Allocation of Sample Sizes to Stata	161
10	Cluster Sampling	169
10.1	Unbiased Estimate of the Mean	169
10.2	The Variance	175
10.3	An Unbiased Estimate of $Var(\hat{Y})$	177
11	Two-Stage Sampling	183
11.1	Two-Stage Sampling	183
11.2	Sampling for Non-Response	189
11.3	Sampling for Stratification	196
A	The Normal Distribution	203
	Index	205
