

CONTENTS

Preface	vii
1. MEETING THE COMPUTER	
Preview	1
1.1 Importance of Computers	1
1.2 A Glimpse of Number Theory	3
1.3 How to Recognize a Computer	6
1.3.1 Computer Storage	8
1.3.2 Input-Output Devices	10
1.3.3 Computer Systems	10
1.3.4 Computer Trends	16
1.4 Telling the Computer What to Do	17
1.5 Flowcharting	19
1.6 Writing the Program	21
Review Exercises	23
2. BASIC PROGRAMMING	
Preview	24
2.1 BASIC Program Elements and Structure	24
2.2 Input-Output	33
2.3 Assigning Values to Variables	40
2.4 Control Statements	46
2.5 BASIC Functions and Subroutines	59
2.6 Arrays and Subscripts	70
2.7 Advanced Features	75
2.8 Matrices and Matrix Operations	79
2.9 Sample BASIC Programs	96
2.10 Summary	99
Review Exercises	99
3. PRIME NUMBERS	
Preview	104
3.1 The Sequence of Primes	104
3.2 The Sieve of Eratosthenes	111

3.3	Mersenne Primes	113
3.4	Twin Primes	117
3.5	Prime Polynomials	118
	Review Exercises	119
4.	MAGIC CURIOS	
	Preview	121
4.1	Perfect Numbers	121
4.2	Amicable Numbers	123
4.3	Armstrong Numbers	126
4.4	Special Four-Digit Numbers	127
4.5	Lucky Numbers	127
4.6	Abundant and Deficient Numbers	128
4.7	Square Numbers	130
	Review Exercises	132
5.	FACTORING	
	Preview	134
5.1	Factorization	134
5.2	Greatest Common Divisor	141
5.3	Least Common Multiple	144
5.4	GCD and LCM for Several Numbers	146
	Review Exercises	149
6.	FIBONACCI NUMBERS	
	Preview	151
6.1	The Fibonacci Sequence	152
6.2	Fibonacci Numbers and Primes	157
	Review Exercises	159
7.	MAGIC SQUARES	
	Preview	160
7.1	Origin	160
7.2	What is a Magic Square?	163
7.3	Odd Order Magic Squares	165
7.4	Even Order Magic Squares	169
7.5	Magic Squares Starting With Numbers other than One	175
7.6	Multiplication Magic Square	181
7.7	Geometric Magic Square	185

7.8	Other Interesting Magic Squares	188
7.9	The Magic Triangle	190
	Review Exercises	191
8.	COMPUTERS AND THEIR NUMERATION SYSTEMS	
	Preview	195
8.1	Introduction	195
8.2	Binary Numbers	196
8.3	A Binary Game	197
8.4	Decimal Numbers	199
8.5	Hexadecimal Numbers	200
8.6	Octal Numbers	202
	Review Exercises	203
9.	MODULAR ARITHMETIC	
	Preview	205
9.1	Introduction	205
9.2	Clock Arithmetic	206
9.3	Casting Out Nines Technique	208
9.4	Chinese Remainder Theorem	210
9.5	Monkeys and Coconuts	213
	Review Exercises	214
10.	NUMBER THEORY FOR FUN	
	Preview	217
10.1	Mind Reading Tricks	217
10.2	Mathemagic Square	220
10.3	Diophantine Problems	221
10.4	Four Color Problem	222
10.5	The Pythagorean Problem	224
10.6	Pascal's Triangle	226
10.7	Unsolved Problems	229
10.8	π in the Computer Age	230
10.9	Hard Problems	230
	Review Exercises	234
	Glossary of Computer Terms	236
	Index	247
