<i>List of illustrations</i>	viii
<i>Preface</i>	ix
<i>Acknowledgments</i>	xii
<b>1 What is the philosophy of psychology?</b>	<b>1</b>
1.1 What counts as psychology?	2
1.2 Historical background	3
1.3 Psychological concepts and the philosophy of psychology	6
1.4 Philosophy of psychology and philosophy of mind	13
<b>2 Levels of psychological explanation and the interface problem</b>	<b>16</b>
2.1 Explanation at different levels	17
2.2 Personal and subpersonal levels of explanation	27
2.3 Horizontal explanation, vertical explanation and commonsense psychology	31
2.4 The interface problem and four pictures of the mind	35
<b>3 The nature of commonsense psychology: the autonomous mind and the functional mind</b>	<b>40</b>
3.1 The autonomous mind and commonsense psychology	41
3.2 The autonomous mind and the interface problem	44
3.3 The functional mind	52
3.4 Philosophical functionalism and psychological functionalism	58
3.5 Psychological functionalism and the interface problem	61
<b>4 Causes in the mind: from the functional mind to the representational mind</b>	<b>71</b>
4.1 Causation by content: problems with the functional mind	71
4.2 The representational mind and the language of thought	81
4.3 The mind as computer	92

<b>5</b>	<b>Neural networks and the neurocomputational mind</b>	<b>97</b>
5.1	Top-down explanation vs the co-evolutionary research strategy	97
5.2	Cognition, co-evolution and the brain	105
5.3	Neural network models	109
5.4	Neural network modeling and the co-evolutionary research paradigm: the example of language	119
<b>6</b>	<b>Rationality, mental causation and commonsense psychology</b>	<b>134</b>
6.1	Real patterns without real causes	135
6.2	How anomalous is the mental?	153
6.3	The counterfactual approach	163
6.4	Overview	170
<b>7</b>	<b>The scope of commonsense psychology</b>	<b>172</b>
7.1	Thinking about the scope of commonsense psychology	173
7.2	Implicit and explicit commonsense psychology: the broad construal	178
7.3	Modest revisionism: the simulationist proposal	185
7.4	Narrowing the scope of commonsense psychology (1)	194
7.5	Narrowing the scope of commonsense psychology (2)	198
7.6	A suggestion?	205
<b>8</b>	<b>From perception to action: the standard view and its critics</b>	<b>208</b>
8.1	From perception to action: the standard view	209
8.2	Cognitive architecture and the standard view	215
8.3	The distinction between perception and cognition	221
8.4	Domain-specific reasoning and the massive modularity hypothesis	228
<b>9</b>	<b>Propositional attitudes: contents and vehicles</b>	<b>244</b>
9.1	Another look at the interface problem	245
9.2	The argument for structure	249
9.3	The problem of structure in artificial neural networks	254
9.4	Rejecting the structure requirement	260
9.5	Finding structure in artificial neural networks	266
9.6	Overview	276
<b>10</b>	<b>Thinking and language</b>	<b>279</b>
10.1	Thinking in words (1): the inner speech hypothesis	280
10.2	Thinking in words (2): the rewiring hypothesis	287
10.3	The state of play	295
10.4	Practical reasoning and the language of thought	297

10.5	Perceptual integration	304
10.6	Concept learning	310
	<b>Concluding thoughts: toward a fifth picture</b>	<b>318</b>
	<i>Annotated bibliography</i>	333
	<i>Bibliography</i>	350
	<i>Index</i>	371
