Introduction	1
1 Language and complex systems	5
Examples of complex systems	7
Principles of complex systems	11
Language as a complex system	19
2 Linguistics, science, the humanities, and complex systems	36
Linguistics as a science	36
The epistemology of modern science: Wilson and Gould	38
An alternative to reductionism	44
The social history of modern science among the disciplines	47
The humanities as modern science?	52
3 Usage-based linguistics and complex systems	56
Paul Hopper (1987)	57
Paul Hopper and Elizabeth Traugott (1993)	59
Joan Bybee (2001)	61
Janet Pierrehumbert (2001)	64
Adele Goldberg (2006)	68
Michael Tomasello (2003)	70
Nick Ellis and Diane Larsen-Freeman (2009)	73
Joan Bybee (2010)	76
Usage-based linguistics and complex systems	78
4 Grammar and complex systems	81
Zipf's Law and the 80/20 Rule	83
English grammar	86
Complexity science and grammar	93
Improved grammars	96
5 Complex systems and the history of the English language	105
Clockwork	106
	vii

Grammaticalization	109
A-curve frequency profiles	112
Punctuated equilibrium in language change	121
6 Neural networks and complex systems	131
Models in cognitive science	134
Neural network simulations	138
Self-Organizing Maps	141
Making word choices	150
7 Sociolinguistics, communities, and complex systems	155
Classic North American sociolinguistics	155
Speech communities and populations of speakers	164
New varieties	167
An experiment on scale-free communities	170
Measurement of scale-free data	180
Complex systems for sociolinguists	192
8 Postmodernism and complex systems	201
Fashionable nonsense	202
Postmodernism and speech	207
Last words	212
