

# Contents

|   |     |
|---|-----|
| <i>Preface</i>  | vii |
| 1 Pseudorandom number sequences   | 1   |
| 1.1 Random and pseudorandom sequence generation   | 1   |
| 1.2 Linear congruential sequences   | 3   |
| 1.3 M-sequences   | 10  |
| 1.4 Maximal-length number sequences   | 22  |
| 1.5 Related and combined sequences  | 25  |
| 2 Elements of M-sequence generation theory  | 30  |
| 2.1 Generation of shifted M-sequence replicas   | 30  |
| 2.2 Algorithm for high-speed determination of shifted-replica correlation coefficients    | 40  |
| 2.3 Computation of correlation coefficients by decimation                                 | 46  |
| 2.4 Determination of shift value for M-sequences  | 53  |
| 2.5 Theoretical and numeric method of defining M-sequence symbols                         | 59  |
| 3 Pseudorandom sequence generators  | 63  |
| 3.1 M-sequence generators   | 63  |
| 3.2 Pseudorandom number generators  | 69  |
| 3.3 Multichannel PRNS generators  | 80  |
| 3.4 Composite number sequence generators  | 88  |
| 4 Pseudorandom signals in automated test systems  | 95  |
| 4.1 Digital automated control systems for dynamic testing of complex engineering products | 95  |
| 4.2 Characteristics of driving processes  | 106 |
| 4.3 Generation of narrowband test signals   | 114 |
| 5 Pseudorandom sequences in the testing of digital devices                                | 125 |
| 5.1 Specific features of pseudorandom sequences in test pattern generation                | 125 |
| 5.2 Pseudorandom test pattern generators  | 128 |
| 5.3 Design of test patterns for automated test systems                                    | 131 |
| 5.4 Synthesizing PTP generators for LSI self-testing                                      | 136 |
| 5.5 Signature analysis  | 143 |
| 5.6 Synthesizing multichannel signature analysers   | 149 |
| <i>References</i>   | 158 |
| <i>Index</i>  | 165 |
