## Part I: The phenomenon and the theoretical background

### Chapter 1

An introduction to vowel harmony	3
1.1 Harmonic features	5
1.1.1 Single feature harmonies	6
1.1.2 Multiple feature harmonies	9
1.1.3 Restricted harmonies	15
1.1.4 Summary and discussion	16
1.2 The role of consonants in vowel harmony	21
1.3 The domain of harmony	24
1.4 Opacity and transparency	26
1.4.1 Opaque vowels	27
1.4.2 Transparent vowels	28
1.4.3 Trojans and Hybrids	33
1.5 Dominance, morphological control, and Umlaut	35
1.6 Setting the scene	43

### Chapter 2

Optimality Theory and the formalisation of harmony	49
2.1 Violability and conflict	49
2.2 Markedness and faithfulness	54
2.3 Positional faithfulness	59
2.4 Be faithful to your neighbour	
– assimilation in Correspondence Theory	61
2.4.1 Feature alignment	62
2.4.2 Positional faithfulness	
– externally motivated harmony	66
2.4.3 Assimilation as correspondence	69

2.5	Constraint coordination	77
Chapter 3		
	Cyclicality and phonological opacity as constraint coordination and positional faithfulness	89
3.1	Morphological control as a matter of integrity	90
3.2	Asymmetries and anchoring	96
3.3	Vowel transparency as local conjunction	104
3.4	Trojan vowels and local conjunction	107
3.5	Parasitic harmony	108
3.6	Summary	109
<b>Part II: Case studies</b>		
Chapter 4		
	Edge effects and positional integrity	113
4.1	Introduction	113
4.2	Yoruba and anchoring	115
4.2.1	Harmony and the right word edge in Yoruba	116
4.2.2	An anchoring analysis of the asymmetry in roots	117
4.2.3	Harmony, anchoring, and affixation	119
4.3	Turkish anchoring and integrity	120
4.3.1	Left-anchoring	121
4.3.2	Root control and integrity	123
4.3.3	The exceptions	126
4.4	Değema and integrity	133
4.5	Diola Fogni dominance as local conjunction	135
4.6	Pulaar affix control as positional faithfulness	137
4.6.1	The data	137
4.6.2	An analysis as affix control	140
4.6.3	Possible alternatives to affix control	145
4.7	Recent accounts	147
4.7.1	The alignment approach to harmony	147
4.7.2	First syllable faithfulness	148
4.7.3	The SAF approach to root control	149
4.8	Conclusion	152

Chapter 5		
Vowel transparency as balance		157
5.1	The case of Finnish – a grammar of balance	158
5.1.1	The Finnish harmony pattern	158
5.1.2	Finnish feet and balanced vowels	160
5.1.3	The basic constraint set-up	161
5.1.4	The conjunction of balance in the Finnish grammar	163
5.2	Wolof ATR harmony and balanced vowels	172
5.2.1	The Wolof harmony pattern	173
5.2.2	ATR balance in Wolof harmony	174
5.2.3	The opaque vowel	180
5.3	Previous analyses	182
5.3.1	Transparency as neutrality	182
5.3.2	Targeted constraints and sympathy	183
5.4	Conclusion	186
Chapter 6		
Trojan vowels and phonological opacity		187
6.1	Hungarian – Trojan vowels in backness harmony	188
6.1.1	A preliminary harmony grammar for Hungarian	189
6.1.2	Hungarian Trojan vowels	191
6.1.3	Hungarian balanced vowels reconsidered from the learning perspective	194
6.1.4	Summary	200
6.2	Yoruba high vowels – Trojan vowels and root controlled ATR harmony	200
6.2.1	High vowels and mid vowels	200
6.2.2	A Trojan grammar for Yoruba	201
6.3	Nez Perce – a Trojan vowel in dominant-recessive ATR harmony	209
6.4	Yawelmani opacity	215
6.4.1	The basic harmony pattern and the Yawelmani inventory	217
6.4.2	Yawelmani uniformity and opacity as constraint interaction	219
6.4.3	Yawelmani epenthesis and shortening	232
6.4.4	Previous approaches to Yawelmani opacity	237

6.5	Previous analyses of Trojan vowels	242
6.6	Conclusion	244
Chapter 7		
	General conclusion	247
7.1	Overall summary	247
7.2	The ghosts of serialism	250
7.3	Underspecification and Lexicon Optimization	254
7.4	Factorial typology and constraint coordination	256
7.5	Outlook	259
