

Contents

Foreword	ix
Preface	xi
Lecture Notes	
Complex Kleinian groups W. BARRERA, A. CANO, J. P. NAVARRETE, and J. SEADE	1
Complete Lorentzian 3-manifolds VIRGINIE CHARETTE and TODD A. DRUMM	43
The Goldman bracket and the intersection of curves on surfaces MOIRA CHAS	73
An introduction to flows on homogeneous spaces S. G. DANI	85
Quantitative geometry of hyperbolic manifolds PETER B. SHALEN	103
Discrete groups and Riemann surfaces ANTHONY WEAVER	129
Research Expositions	
A note on Chern's theorem on invariant measures VIKRAM T. AITHAL	161
Random affine lattices JAYADEV S. ATHREYA	169
Upper central series for the group of unitriangular automorphisms of a free associative algebra VALERIY G. BARDAKOV and MIKHAIL V. NESHCHADIM	175
Hermitian structure and bundles on G/Γ INDRANIL BISWAS	189
Log-Riemann surfaces, Caratheodory convergence and Euler's formula KINGSHOOK BISWAS and RICARDO PEREZ-MARCO	197
Uniformization of simply connected finite type Log-Riemann surfaces KINGSHOOK BISWAS and RICARDO PEREZ-MARCO	205

The Euler characteristic of a Haken 4-manifold ALLAN L. EDMONDS	217
A discreteness criterion for groups containing parabolic isometries VIVEKA ERLANDSSON and SAEED ZAKERI	235
On the z -classes in a centrally finite division ring RONY GOURAIGE	243
On Lorentz spacetimes of constant curvature FRANÇOIS GUÉRITAUD	253
On the asymptotic behavior of complex earthquakes and Teichmüller disks SUBHOJOY GUPTA	271
Characteristically simple Beauville groups, I: Cartesian powers of alternating groups GARETH A. JONES	289
Relatively hyperbolic spaces ABHIJIT PAL and AKSHAY KUMAR SINGH	307
Complex hyperbolic free groups with many parabolic elements JOHN R. PARKER and PIERRE WILL	327
On Fatou components and omitted values TARAKANTA NAYAK	349
Some dynamical properties of certain meromorphic functions SHENGLAN YUAN	359
