ONE Introduction	1
Indeterminacy in Sociocultural Research	3
The Anthropological Approach to Research	9
Cultural Anthropology and the Domain of Science	12
TWO Cultural Systems and Ethnographic Research Design	22
The Nature of Systems	22
System Orientations in Cultural Anthropology	27
Research Design	35
THREE Quantifying Cultural Data	42
Why Quantify?	43
Quantification and Mathematics	46
Quantification and Statistics	48
The History of Quantitative Approaches in Cultural Anthropology	60
FOUR The Input-Output Orientation	75
Measuring Input and Output	78
Population, Work, and Health	83

FIVE The Exchange Orientation	96
Exchange Relations	101
Society as a Behavioral System	116
SIX The Culture-and-Personality Orientation	118
Culture-and-Personality Research	119
An Intuitive Approach	123
More Rigorous Approaches	127
SEVEN The Maximization Orientation	141
Measurement and Maximization	142
Maximization Relying Principally on Cash Measures	143
Alternatives to Cash	149
Maximization and Markets	151
EIGHT The Cognitive/Structural Orientation	158
Psychological Validity	163
Sharing	170
Cognition and Behavior	178
Cross-Cultural Comparison	183
NINE Computer Analysis of Cultural Systems	185
Computer Simulation	186
Multivariate Analysis	192
TEN Conclusion	204
Bibliography	211
Index	226
