Preface	xi	
Acknowledgments	xvii	
1	LIFE HISTORY AND DEMOGRAPHY	1
	Why Study Life History and Demography?	6
	The Organization of This Book	11
	Human Evolutionary Ecology	12
	Life History Theory	18
	Demography and Life History Theory	32
	Summary	35
2	THE ACHE	41
	Area Overview	42
	Prehistory of Eastern Paraguay	43
	Ethnohistory	44
	Current Situation	56
	Modern Ecological Studies	57
	Biological and Genetic Affinity	58
	Ecology of Eastern Paraguay	60
	Forest Life	65
	Reservation Life	73
	Summary	78
3	STUDY POPULATION AND SAMPLING METHODS	83
	Study Population	84
	The Sample and Methods of Data Collection	85

Reliability of Interview Data	94
Sample Bias	96
The Contact Problem	100
Summary	100
4 AGE AND SEX STRUCTURE OF THE STUDY POPULATION	111
Difficulties of Estimating Ages for the Ache	112
Howell's Method for Estimating !Kung Ages	114
Some Problems Using Stable Population Models	115
Deriving Age Estimates for the Ache	119
Age-Sex Structure of the Northern Ache	132
Comparison with the !Kung and Yanomamo	134
Summary	134
5 CAUSES OF MORTALITY	151
Mortal Dangers in the Forest and on the Reservation	152
Customs Concerning Sickness and Death	155
Analytical Methods and Choice of Sample	157
Causes of Mortality during the Forest Period	158
Comparison with the !Kung and Yanomamo	165
Causes of Death during the Contact Period	166
Causes of Death during the Reservation Period	167
Summary	168
6 RATES OF MORTALITY	179
The Life Table/Mortality Hazard Approach	179
Mortality Parameters of the Forest Living-Ache	183
Comparison with the !Kung and Yanomamo	187
The Contact Period	188
The Reservation Period	190
Summary	192
7 DEVELOPMENT, MARRIAGE, AND OTHER LIFE COURSE EVENTS	219
Childhood Development	219
Adolescence	223

Marriage and Divorce	226
Old Age	235
Summary	237
8 FEMALE FERTILITY	249
Pregnancy and Birth	249
Fertility during the Forest Period	252
Comparison with the !Kung and Yanomamo	254
Fertility during the Reservation Period	256
Summary	257
9 MALE FERTILITY	273
Paternity	273
Fatherhood	275
Fertility during the Forest Period	277
Comparison with the !Kung and Yanomamo	279
Fertility during the Reservation Period	280
Summary	281
10 RESOURCE AVAILABILITY, INTRINSIC VARIATION, AND LIFE CYCLE CONSTRAINTS	293
Measures of Independent Variables in Life	
History Models	294
Infant and Childhood Mortality	295
Adult Mortality	304
Variation in Female Fertility Rate	305
Variation in Male Fertility Rate	316
Summary	317
11 BODY SIZE AND THE TIMING OF SEXUAL MATURITY	341
Allometry, Determinate Growth, and Ache	
Growth Patterns	342
Optimal Age at First Reproduction	345
Summary	356

12	LIFE HISTORY TRADE-OFFS AND PHENOTYPIC CORRELATIONS	375
	The Cost of Reproduction	377
	Offspring Number and Offspring Fitness	380
	Components of Reproductive Success and Intergenerational Correlations	385
	Men and Women with High Reproductive Success	389
	Summary	391
13	KIN EFFECTS ON LIFE HISTORY	419
	Kin Effects on Mortality	420
	Kin Effects on Fertility	426
	Reproductive Senescence	427
	Infanticide and Child Homicide	434
	Sex-Biased Investment	439
	Patterns in Female Mating and Female Mate Choice	442
	Summary	445
14	CONCLUSIONS	467
	Life History of the Ache and Other Modern Foragers	467
	Humans as Apes	469
	Humans as Hominids	471
	Theoretical Implications	474
	Applied Anthropological Demography	476
	Appendix A. Implications of Stable Age Models for Deriving !Kung Ages	485
	Appendix B. Block Rankings of Relative Age	491
	Appendix C. Five Genealogies with Multiple Generations	501
	References	529
	Index	553
