Introduction	XI
Theoretically oriented acquisition studies: The state of the art in Italian	XI
The different modes of acquisition	XII
Some general assumptions of linguistic analysis	XIII
PART 1. The acquisition of morphosyntactic properties	
CHAPTER 1	
The acquisition of verb inflections and clause structure	3
1.1 Introduction	3
1.2 Acquisition of verbal tenses	6
1.3 Acquisition of present tense inflections	7
1.4 The process of subject-verb agreement	10
1.5 Acquisition of the finite versus infinitive verb distinction	13
1.6 Why aren't there any root infinitives in early Italian?	14
1.7 Imperatives as the Italian analogue of root infinitives	16
1.8 Copula	21
1.8.1 Descriptive facts and generalizations	21
1.8.2 An account of the declarative versus <i>wh</i> -question asymmetry in copula omission	25
1.8.3 The copula in negative contexts	26
1.9 Compound tenses and optional past participles	27
1.10 Past participles: Verbal or adjectival nature?	31
1.11 Regular and irregular past participles and past definite	32
1.12 The 'imperfetto'	34
1.13 Acquisition of verb inflections in children with SLI and Developmental Dyslexia	38
Summary and questions for future research	43
CHAPTER 2	
The acquisition of articles and aspects of nominal inflection	47
2.1 Introduction	47
2.2 The L1 acquisition of articles	50
2.3 Article use in Italian keeping an eye on the crosslinguistic dimension	54
2.4 Article omission and phonological constraints	56
2.5 Article omission and the syntactic context: The subject-object asymmetry in Italian	60

- 2.6 An attempt towards a multi-facet explanation 62
- 2.7 Article omission in non-initial positions: Complement of prepositions 68
- 2.8 Acquisition of articles in the bilingual children and adult L2 learners 69
- 2.9 Article omission in children with Specific Language Impairment 71
- 2.10 The acquisition of nominal inflection in children with typical development and in children with SLI 74
- 2.11 Morphological derivation: The diminutive 77
Summary and questions for future research 79

CHAPTER 3

The acquisition of pronominal clitics

81

- 3.1 Introduction 81
- 3.2 Clitics in L1 Italian 86
 - 3.2.1 Clitic omission in early Italian productions 86
 - 3.2.2 Is the unexpressed object an omitted clitic or a null-object? 90
 - 3.2.3 Italian clitics and past participle agreement 97
- 3.3 Clitics in L2: Bilingual/Child L2 Italian and Adult L2 Italian 100
- 3.4 Italian clitics in atypical development 108
 - 3.4.1 Clitics in SLI: Clitics as markers of language impairment 108
 - 3.4.2 Clitics in children with cochlear implant 114
 - 3.4.3 Clitics in children with Developmental Dyslexia 116
- 3.5 The comprehension of object clitics by monolingual children acquiring Italian 117
Summary and questions for future research 125

CHAPTER 4

The acquisition of passive voices

129

- 4.1 Introduction 129
 - 4.1.1 The derivation of passive 132
- 4.2 The production of Italian passive sentences in typically developing monolingual children 133
 - 4.2.1 Notes on *si*-causative passive in young children 142
- 4.3 Some results from comprehension in monolingual children 145
Summary and questions for future research 148

PART 2. The acquisition of some (discourse) interface properties

CHAPTER 5

The acquisition of relative clauses

153

- 5.1 Introduction 153
- 5.2 Production 157

- 5.2.1 The production of subject and object relatives in typically developing children 157
- 5.2.2 The production of Passive Object Relatives in children 162
- 5.2.3 The production of Passive Object Relatives in adults in comparison with children of different ages 164
- 5.2.4 The position and nature of the subject in the object relatives produced by children 165
- 5.3 The comprehension of subject and object relatives in typically developing children 170
 - 5.3.1 Intervention and feature mismatch in the comprehension of object relatives 173
 - 5.3.1.1 The comprehension of object relative and number mismatch 175
 - 5.3.1.2 The comprehension of object relatives and gender mismatch 177
- 5.4 Toward interpreting children's development: Intervention and the locality of syntactic dependencies 180
 - 5.4.1 Feature mismatch and the grammatical status of morphosyntactic features 184
 - 5.4.2 Number feature and pronouns as relative heads or subjects: Comprehension and production 186
 - 5.4.3 Passive and intervention: PORs in elicited production 189
- 5.5 The acquisition of Subject and Object relatives in special circumstances: In children with SLI, with developmental dyslexia, in autistic children, in hearing impaired children, in adult L2 acquisition 192
 - Summary and questions for future research 198

CHAPTER 6

The acquisition of Wh-questions

203

- 6.1 Introduction 203
- 6.2 The L1 acquisition of wh-questions 207
- 6.3 Comprehension of subject and object wh-questions 209
- 6.4 Production of subject and object questions with reversible verbs 212
- 6.5 Some reflections of comprehension and production of Italian wh-questions in a cross-linguistic perspective 216
- 6.6 Why are Italian wh-questions hard? 218
- 6.7 How many interference processes? 224
- 6.8 Wh-questions in children with SLI or Developmental Dyslexia 226
 - Summary and questions for future research 228

CHAPTER 7		
The acquisition of the syntax and interpretation of subjects		231
7.1	Introduction	231
7.2	Null and overt subjects in typically developing children	238
7.2.1	More on post-verbal subjects in typically developing children according to verb classes and definiteness	241
7.3	Subjects in different populations	247
7.3.1	Considerations on null subjects in SLI	247
7.3.2	Post-verbal and null subjects in (adult) L2	247
7.3.2.1	Post-verbal new information subjects	247
7.3.2.1.1	Post-verbal subjects with unaccusatives	251
7.3.2.2	Null and overt pronominal subjects in (adult) L2 with reference to attrition	252
7.3.3	Overt and null subjects in bilinguals	255
	Summary and questions for future research	260
CHAPTER 8		
The acquisition of aspects of Italian compositional semantics and of semantic-pragmatic interface		263
8.1	Introduction	263
8.2	Quantifiers in early speech	267
8.3	The acquisition of scope interactions	268
8.4	Principle C, quantification and reconstruction	273
8.5	Pragmatic knowledge: The case of scalar implicatures	275
8.5.1	Italian adults and children's interpretation of "or"	276
8.5.2	Italian adults and children's interpretation of "some"	277
8.5.3	Some prerequisites for generating Scalar Implicatures	278
8.5.4	Experimental manipulations matter... to some extent	281
8.5.5	Children are not underinformative speakers	283
8.5.6	Where are we?	283
8.5.7	Conversational understanding in bilingual children	284
8.5.8	Pragmatic skills in children with specific language impairments	288
8.5.9	Taking stock. Why are children more logical than adults?	288
8.6	Gradable adjectives	290
	Summary and open questions for future research	294
Conclusion		297
	The contribution of studies on the acquisition of Italian	297
